PART A - MOTIVATION REPORT

Introduction

Nature & Function of a CID

The City Improvement District (CID) is a community-driven initiative, facilitated by the City of Cape Town to enhance and supplement municipal services in a defined area. The Welgemoed CID NPC was approved and established in 2020 for the first 5-year term.

WCID has successfully delivered on all commitments per the first term business plan and has shown significant improvement in crime reduction, environmental sustainability, social connection and community upliftment, as detailed in the annual report (refer to www.welgemoedcid.co.za).

Notable achievements during first term include:

- Stable management and operations structures, with solid finance management and governance structures in place – as evidenced by unqualified audits being obtained for every year of its existence; also well attended and participatory Annual General Meetings being successfully held for the past 5 years.
- Monitoring, evaluation, review and learning frameworks have been developed, better articulating the line of sight between activities, outcomes and objectives across all programmes.
- Contracting of professional service providers in the public safety, urban management and environmental development programmes and exploration of partnerships in social development and communications programmes and the implementation of service provider performance management frameworks on key contracts.
- Established social services partnerships to support the vulnerable – special focus on the homeless in and around Welgemoed through Mould Empower Serve (MES) case management and work-based rehabilitation programmes.
- Event support and community initiatives (Welgemoed Market, Welgemoed in Symphony and a frequent quarterly Fun run on the Welgemoed Golf course)
- Installation of Licence Plate Recognition technology (LPR) in the WCID boundaries.
- Installation of fencing around Welgemoed, channelling foot traffic to entry points with camera surveillance in place.

- Increased public safety footprint resulting in a significant reduction in crime incidents.
- Strengthened relationships with SAPS
- Upgrade of Sluysken park as a pilot park upgrade and reference point for the second term business plan

THE WCID ADDS VALUE

WCID Strategic Objectives

Herewith follows the application for the extension of the WCID operations for the second term renewal. This report is prepared to provide motivation for extending the Welgemoed CID term with supporting budget and the implementation plan.

Welgemoed CID's strategic driver and promise to its residents is 'A better Welgemoed to all' and execution thereof is covered in four core pillars:

1. Safety and security – proactive security with the use of technology and 24/7 armed public safety response.
2. Cleaning – keeping Welgemoed clean with ongoing litter removal and other cleaning initiatives.
3. Greening – rehabilitation of indigenous plants, general maintenance and upgrade of parks and green areas, creating cross-generational common spaces.
4. Social Responsibility – partnering with charities in and around Welgemoed, fostering a culture of caring for the less fortunate with tangible support through WCID, representing Welgemoed as a community.
5. Community Drives – supported community events and activities, creating a platform for resident to fostering long-lasting relationships with each other.

WCID Core Values

Welgemoed CID is governed by a robust framework of core values that underpin its strategic and operational decisions. Integrity is at the heart of our governance, ensuring that all actions and decisions are made with transparency and honesty. Inclusion is fundamental to our approach, fostering a diverse and equitable environment where every stakeholder's voice is heard and valued. Sustainability drives our commitment to environmental responsibility, guiding us to implement practices that protect natural resources and promote long-term ecological balance. Innovation is another key value, encouraging us to embrace new ideas and continuously improve our processes and services. Lastly, accountability ensures that we are responsible for our actions, maintaining high standards of performance and ethics. Together, these values form the foundation of our governance, shaping our organizational culture and strategic direction.

Name of the City Improvement District

Welgemoed City Improvement District NPC (WCID), established in July 2020

Applicant's name and business address:

Welgemoed CID NPC board of directors, represented by Francois Laurence

Registration Number: 2020/556954/08

Registered Address:

23 Bakker Street

Unit 10c, Welgemoed Forum

Welgemoed

7530

Tel: 086 12 12 315

Email: Info@wegemoedcid.co.za

Defined Area of the Welgemoed CID

The defined area includes the suburb of Welgemoed in its entirety along its cadastral boundaries and forms the largest part of the defined area. To the south a portion of Loevenstein is included as well as Blomvlei, Selborne and Welgemoed Greens.

To the northeast of Kenridge Ext 4, the Bergzicht housing cluster and the row of houses on the northern side of Wylant Street, which falls within the suburb of Door-de-Kraal, are included. The defined geographical area for the WCID is shown below.

Consistency with Integrated Development Plan (IDP)

Introduction

The IDP of the City rests on 3 foundations, 3 second-tier priorities and 3 top-tier priorities. Together this supports the vision for the City of Cape Town's City of Hope. The IDP is based on the City's 16 objectives linked to its priorities and foundations. The WCID's supplementary and enhanced services are consistent with the City's IDP objectives with specific reference to the following programmes:

- **Safety.** The Public Safety plan supports effective Law Enforcement to make communities safer and this is supported using technology such as CCTV. The Public Safety plan also strengthens safety partnerships, thereby aiming for a holistic crime prevention programme as noted in Objective 5 and 6 of the IDP.
- **Economic Growth.** The WCID is working towards the continuous development and improvement of the urban environment through public safety, cleaning, urban management, and social initiatives, all aimed at safeguarding existing businesses and economic opportunities thereby maintaining and creating employment opportunities. A well-maintained and managed area stimulates investment and WCID therefore directly supports further economic growth.
- **Cleaning and the environment.** The WCID's urban cleaning and maintenance plan supports the objectives of a healthy and sustainable environment. This is specifically aimed at the public space and amenities of the city, creating safe, quality public spaces whilst supporting environmental sustainability as noted in Objective 4, 9 and 11 of the IDP. The waste minimisation and cleaning activities provided as a supplementary service further enhances the basic services provided by the City of Cape Town.

- **Urban Maintenance.** The WCID's urban maintenance work also supports Objective 13 in the IDP through the maintenance of road and associated infrastructure thereby creating a better environment for pedestrians, cyclists, and vehicles alike.
- **Social Development.** The WCID supports the City's Social Upliftment Strategies to find lasting solutions for Social Development, which includes supporting individuals to move from the street into places of safety, support NGOs that provide social services and where possible create employment opportunities as noted in Objective 15 of the IDP.

Each of these priorities and objectives are considered within each of the main service areas of the WCID business plan and highlighted in each section.

Proposed Services and/or Projects

Improving Public Safety

The public safety factor in an ideal suburb reflects in the free movement of residents and visitors without any concern of personal or property safety. This means that although concerted efforts are maintained to allow this freedom of movement and atmosphere, all the efforts occur but are not at the forefront of daily life. To this end Welgemoed CID will continue operate and expand an extensive surveillance network in our area and collaborate with adjacent areas to support the local public safety and security patrol efforts and allow all security service providers in the area to liaise with and benefit from the WCID operations as managed from the local control room.

The WCID public safety operations are based on 2 public safety officers in WCID branded clothing and 2 patrol vehicles co-branded with both the logos of the WCID

and the service provider that patrol the area on a 24-hour per day basis on 12-hour shifts. Part of the public safety officers' work tasks is to complete foot patrols daily in the areas that are not accessible by vehicle.

The WCID surveillance network currently manages 74 human detection and general overview cameras as well as 29 LPR cameras. The surveillance systems and network is managed from the WCID control room on an underlying SLA basis with a service provider. Performance of the network is continuously monitored by the controllers and WCID management.

During first term, WCID has installed an Incident Desk system to capture all activities of the WCID operational team. This enables the team to follow up on incidents, share information in a structured format and allows a professional output on information to relevant stakeholders.

The operational costs provided for in the second term business plan reflects an extrapolation of first term public safety costs. The public safety service will go out on tender for service commencement July 2025.

The first term fencing project has had a significant impact on pedestrian movement control at night. Provision for an additional 200m of fence installation during second term has been provided.

Surveillance network expansion - the current network covers all incoming and outgoing routes to the greater WCID area as well as some main routes within the area. In the second term plan the Jip De Jager thoroughfare road will be revisited for some changed and new surveillance locations. Second term renewal allows for 5 further surveillance locations.

The public safety services as planned is in support of the IDP, directly supporting the top-tier priorities of Safety, Economic Development and Basic Services. The envisioned public safety services support Objectives 5 (Effective law enforcement to make communities safer) and 6 (Strengthen partnerships for safer communities).

The cost of the proposed public safety service during the five-year term is summarized below.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total expenditure
Public Safety	R 1 435 200	R 1 492 608	R 1 552 312	R 1 614 405	R 1 678 981	R 7 773 506
CCTV Monitoring	R 304 928	R 317 125	R 329 810	R 343 003	R 356 723	R 1 651 588
Repairs & Maintenance - CCTV	R 37 440	R 38 938	R 40 495	R 42 115	R 43 800	R 202 787
Capital Projects	R 100 880	R 394 243	R 186 727	R 98 853	R 102 807	R 883 511
TOTAL	R 1 878 448	R 2 242 914	R 2 109 345	R 2 098 375	R 2 182 310	R 10 511 393

Maintenance and Cleansing

The WCID's cleaning plan will support existing waste management services, identify specific management problems and areas and assist in developing additional waste management and cleaning plans for the area.

The WCID will perform the following duties to assist the City of Cape Town with the improvement of the cleanliness of the public spaces within our boundary:

- Removal of graffiti.
- Storm water drain cleaning.
- Street, pavement and gutter sweeping.
- Emptying of bins in public spaces.
- Weeding.

- Removal of illegal posters and stickers where needed.
- Attending to illegal dumping; ·
- Monitoring and reporting maintenance matters to the City using the C3 (City Service Request) platform

We aim to assist in ensuring that urban infrastructure in the area will be improved by identifying and monitoring the state of public infrastructure (roads, pavements, traffic signs, streetlights, road markings and signs) and reporting the defects to the relevant City of Cape Town departments via the City's Service Request platform. Reports will be tracked on a weekly basis until the issue is resolved, failing which it will be escalated in the relevant City departments for resolution.

The WCID is making use of MES Grow teams to clean and maintain the WCID area in conjunction with the WCID greening team. The latter support the WCID Social responsibility strategy directly. The WCID employs 4 full time workers for 8-hour shifts in addition to a team of 4 MES workers for 4 6-hourdays per week. The WCID team can be clearly identified by their yellow WCID bibs and where required with the road signage warning road users of WCID working teams in the area.

The cleaning and urban management services as planned are in support of the IDP. The WCID is working towards the continuous development and improvement of the urban environment through public safety, cleaning, urban management and social upliftment initiatives, all aimed at safeguarding the existing businesses and economic opportunities thereby maintaining and creating employment opportunities.

The Maintenance and Cleansing services as planned are also in support of the delivery of basic services and processes of ensuring that waste materials do not enter drainage systems which supports this priority. This is in line with the Objective 4 of the IDP (Well-managed and modernized infrastructure to support economic growth) specifically objective 4.7 promoting cleanliness and addressing illegal dumping. The WCID will work closely with the City of Cape Town regarding solid waste objective 4.5 (excellence in waste service delivery programme) and 4.6 (waste minimisation and recycling program).

The cost of the proposed maintenance and cleansing service during the five-year term is summarized below. The labour cost portion of the 4 labourers is also included under the salary portion of this report. The cleansing costs for MES GROW is also reflected in the social upliftment section as the social upliftment contribution from WCID.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total expenditure
Labour charges	R 161 787	R 168 259	R 174 989	R 181 989	R 189 268	R 876 292
Cleansing*	R 185 640	R 193 066	R 200 788	R 208 820	R 217 173	R 1 005 486
TOTAL	R 347 427	R 361 324	R 375 777	R 390 808	R 406 441	R 1 881 778

Environmental Management Development

Building upon the foundational achievements of the first term, our focus for the second five-year term will be on enhancing the community impact of our organization through the strategic upgrading of Goewerneur Park, the continued rehabilitation of local indigenous plants in specified areas and applying a broader indigenous planting approach in the more active and used areas by residents in the Welgemoed area. These initiatives are designed to deepen community engagement, creating attractive outdoor parks and open spaces, fostering environmental stewardship, and preserve local biodiversity in dedicated areas.

Goewerneur Park Upgrades

Objective

The primary goal is to transform Goewerneur Park into a vibrant, multi-functional community space that offers recreational and social benefits. The upgrades will address existing infrastructure needs, improve accessibility, and incorporate sustainable practices.

Key Actions

- **Infrastructure Development:** Renovate existing facilities and build new amenities, including updated playgrounds, walking trails, and fitness stations. Incorporate where possible eco-friendly materials and technologies to ensure sustainability.
- **Community Spaces:** Create designated areas for the community. These spaces will be designed to accommodate various activities and gatherings.
- **Accessibility Improvements:** Enhance park accessibility by installing ramps, improving signage, and ensuring that all areas are easily navigable for individuals with disabilities.
- **Safety Enhancements:** Increase park security through better lighting and surveillance cameras.
- **Partnerships and Collaboration:** Work with local businesses, schools, and community groups to sponsor park features and support ongoing maintenance. Foster relationships with environmental organizations to ensure sustainable park management.

Timeline

The park upgrades will be implemented during the first two years of the term. The other parks will be maintained on an ongoing basis in conjunction with the regular municipal service efforts.

Planting Strategy for Parks and Public Open Spaces

Objective

The purpose of the WCID planting strategy, as adopted on 22 April 2025 and shared in a public meeting on 4 August 2025, is to create and maintain vibrant, ecologically responsible, and attractive parks and open spaces that encourage outdoor activity, social interaction, and community pride. All public spaces within Welgemoed should reflect a balance between environmental sustainability, aesthetic appeal, and functionality.

In Term 2, the WCID planting approach will follow a **more inclusive indigenous and endemic planting framework**. This approach enhances biodiversity while ensuring that open spaces remain inviting and accessible to residents of all ages.

Strategic Approach

All planting activities in WCID-managed areas will:

- **Prioritise indigenous South African species**, including locally **endemic Renosterveld plants** where feasible.
- **Balance ecological restoration with community usability**, ensuring parks are visually appealing, safe, and practical for everyday recreational use.
- **Support biodiversity** through the active seasonal area management.
- **Integrate community engagement** where possible into the ongoing maintenance and planting processes.

This approach allows for greater diversity in plant selection and park design while maintaining space for the preservation and rehabilitation of natural Renosterveld areas.

Rationale for the Inclusive Indigenous Approach

1 Aesthetic and Functional Value

Public parks serve recreational and visual purposes. Indigenous species offer rich colour, texture, and seasonal variation, enhancing both aesthetics and user experience. In contrast, exclusive Renosterveld planting, while ecologically valuable, can appear visually uniform and less engaging for recreational park settings.

2 Community Feedback

Community feedback has consistently highlighted a desire for greener, more colourful, and well-structured landscapes. The revised strategy directly reflects these preferences, aligning environmental stewardship with resident expectations.

3 Practical Considerations

Exclusive Renosterveld plantings have proven difficult to manage in urban park environments. Their bushy growth patterns can obscure sightlines, complicate maintenance, and raise safety concerns. The broader indigenous mix allows for better adaptability and structured landscaping.

4 Governance Alignment

The refined planting strategy ensures transparent decision-making and alignment with WCID governance and community consultation processes. It corrects the lack of formal approval that accompanied earlier exclusive Renosterveld initiatives.

5 Ecological Integrity

Indigenous planting remains ecologically responsible, promoting pollinators, water efficiency, and natural resilience. Including endemic species within broader indigenous frameworks enhances ecological function while ensuring parks remain vibrant and usable.

Designated Planting Zones

A: Indigenous-Dominant Areas

Areas prioritising a mix of South African indigenous plants for aesthetic and recreational value:

- Welgemoed Welcome Garden & planned opposite corner garden

- Sluysken Park (currently endemic; indigenous additions for practicality)
- Goewerneur Park
- Imhoff Park
- Chavonne Park
- Van der Merwe Circle
- Patriot Park
- Plettenberg Island

B: Endemic-Dominant (Renosterveld) Areas Developed by WCID

Focus on showcasing and conserving local endemic flora:

- Kommandeur & Pandoer (Karate Club) embankment
- Pandoer/Bell Rosen corner
- Kommandeur Medical Centre area
- Kommissaris/Jip de Jager intersection (Medical Centre node)

C: Naturally Occurring Endemic Zones

Areas where Renosterveld or other endemic vegetation occurs naturally, to be conserved and maintained:

- De Oude embankment (between the golf course and Kommissaris Street)
- Lincoln Park

Key Actions

1 Planting and Rehabilitation

- Implement targeted replanting programmes to restore native vegetation.
- Prioritise degraded areas and create biodiversity gardens across the suburb.

2 Community Engagement

- Volunteer planting initiatives to involve residents.
- Provide educational signage and guides on local flora.
- Encourage resident participation in monitoring and light maintenance.

3 Monitoring and Maintenance of Parks and public open spaces

- Conduct regular maintenance, including pruning, weeding, and mulching.
- Use sustainable irrigation practices and mulch-based moisture retention systems.

4 Partnerships and Research

- Collaborate with the **City of Cape Town Biodiversity Management Branch**, local **environmental NGOs**, and **academic institutions**.
- Liaise with **indigenous nurseries** for plant sourcing.
- Support citizen science initiatives that track pollinator activity or species diversity.
- Liaising with the Recreation & Parks teams to establish a Memorandum of Agreement (MOA) that will allow WCID to submit an application for new intervention / maintenance of existing Parks and public open spaces at the relevant Recreation and Parks District Office.

Urban Upliftment

The WCID embraces **urban upliftment** by reconnecting residents with nature to improve wellbeing, foster stewardship, and strengthen community identity.

The **regreening initiative** will focus on:

- Focus on ecological function in degraded spaces.
- Enhancing pedestrian-friendly connections between parks.

These initiatives align with WCID's sustainability priorities under **Objective 4.5 (Excellence in Waste Service Delivery)** and **Objective 4.6 (Waste Minimisation and Recycling)** by preventing waste intrusion into natural systems and improving urban ecological resilience.

Summation

The refined WCID planting strategy establishes a **balanced, inclusive, and sustainable framework** for managing Welgemoed's parks and open spaces.

By integrating both **indigenous and endemic plant species**, fostering community participation, and enhancing biodiversity, WCID aims to create an enduring legacy of ecological beauty and urban harmony.

The strategy also aligns with the City's environmental strategy, which promotes the use of water-wise vegetation across all open spaces, including parks and road verges, to reduce water consumption and management costs. **Where appropriate**, the strategy also encourages the use of indigenous vegetation to help conserve natural heritage and support the ecological integrity of Cape Town.

Polyphagous shot hole borer (PSHB) beetle

Since 2017, when the first report was received in South Africa of the tiny but seemingly invincible polyphagous shot hole borer (PSHB) beetle, also known as the tree-killing beetle, thousands of trees have died or had to be cut down in urban areas, native forests and more recently in fruit crops. It has been found that a number of susceptible species in Cape Town were

in the southern suburbs. With 65 million urban trees at risk of dying in cities over the next three decades, unless the situation is controlled, the WCID undertakes to notify the City if an infestation is detected in the area.

POLYPHAGOUS SHOT-HOLE BORER

WHAT IS A POLYPHAGOUS SHOT-HOLE BORER (PSHB)?

PSHB is a tiny invasive black beetle from Asia. It is smaller than a sesame seed but can have a devastating effect on trees.

HOW DOES THE POLYPHAGOUS SHOT-HOLE BORER AFFECT TREES?

Firewood can move invasive species like the Polyphagous Shot-Hole Borer which can kill trees.

The beetle tunnels into trees and lines the tunnels with fungus. The tunnelling and fungus kills the tree by obstructing the flow of water and nutrients through its vascular system.

PROTECT THE TREES IN ALL OUR NATURE RESERVES FROM THIS BEETLE BY:

- Only using firewood sold inside the reserve.
- Only bringing in and using eco-logs or charcoal as an alternative to wood to make fire.
- Not moving firewood to another location.

Report any signs of Polyphagous Shot-Hole Borer to pshb@capenature.co.za

Promotion of Social and Economic Development

As Helen Keller wisely said, "Alone we can do so little; together we can do so much," which reminds us that a community must support its most vulnerable members, for our strength is truly measured by how well we uplift those who need it most.

Welgemoed CID's social responsibility execution is realised through selected strategic partners that were identified during the first term. With the following criteria that was applied:

- Location should be close to Welgemoed
- Welgemoed residents should be involved/ support the initiative in person (some residents as involved champions per partner)
- Financially independent (allowing WCID to review and adjust partner selection and funding allocation on an ongoing basis)

- Focussed on upliftment and support of the most vulnerable

Currently the WCID social beneficiaries are:

a) Alta du Toit Aftercare Centre

Accommodates adults with intellectual disabilities for “further care and development during their adult lives.” (<https://www.altadutoit.org.za/>)

Location: Boston (within 1 km of Welgemoed)

WCID supports by:

- Awareness through WCID communication channels when specific events are shared
- Financial support in aid of identified needs (such as frail care mattresses in 2023)

b) Magdalena Home

A counselling centre that provides a comprehensive, faith-based community driven program, guiding and enabling birthparents, adoptive parents/ children and adoptees to a better future. Magdalena Home is an accredited adoption agency. (<https://magdalena.org.za/>)

Location: Boston (within 1 km of Welgemoed).

WCID supports by

- Awareness through WCID communication channels when specific events are shared
- Financial support in aid of identified needs (such as sponsored maternity bags in 2024)

c) Huis Jabes

A safe haven for abused women and children in Cape Town. Huis Jabes, situated in the northern suburbs of Cape Town, provides a temporary home and rehabilitation centre to victims of family abuse. Huis Jabes provides meals, shelter, medical care, counselling and career guidance to empower these women to create a better future for themselves and their children. <https://www.huisjabes.co.za/>

Location: Blomtuin (within 4 km of Welgemoed and two of Huis Jabes trustees being residents of Welgemoed)

WCID supports by

- Awareness through WCID communication channels when specific events are shared
- Financial support in aid of identified needs (such as sponsored UPS batteries for the safe house in 2024)

d) SOS Trust / Aksie Omgee

Providing food hampers to families / children with financial challenges in surrounding schools during the holiday periods.

Location: Boston (within 2 km of Welgemoed)

WCID supports by

- Awareness through WCID communication channels when specific events are shared
- Financial support in aid of identified needs (Sponsorship of between 15 and 20 family food hampers on a quarterly basis)

e) MES Grow Bellville

Providing access to a job rehabilitation process for the homeless/jobless adults leading to an increased occupational intelligence that results in earning a living, restored dignity, enhancement of a person's attitude and self-worthiness. <https://mes.org.za/mes-cape-town-2-2/>

Location: Boston & Welgemoed (within 2 km of Welgemoed)

WCID supports by

- Awareness through WCID communication channels when specific events are shared
- Financial support in aid of identified needs
- Contracting with MES to create work opportunities for MES individuals as cleaning teams in Welgemoed. This works closely with the WCID cleaning and greening portfolios (refer to Cleaning section of this document for more detail).

The social upliftment programmes as planned is in support of the IDP Social Development objectives. The WCID supports the City's Social Upliftment Strategies to find lasting solutions for social development, which includes supporting individuals to move from the street into places of safety, support NGOs that provide social services and where possible create employment opportunities. This is in support of Objective 15 (Building a more spatially integrated and inclusive City).

The cost of the proposed promotion of social and economic development service during the five-year term is summarized below.

Description	Year 1	Year 2	Year 3	Year 4	Year 5	Total expenditure
SOS Trust/ Aksie omgee	R 31 200	R 32 448	R 33 746	R 35 096	R 36 500	R 168 989
Huis Jabes	R 41 600	R 43 264	R 44 995	R 46 794	R 48 666	R 225 319
Huis Magdalena	R 20 800	R 21 632	R 22 497	R 23 397	R 24 333	R 112 660
Alta Du Toit	R 31 200	R 32 448	R 33 746	R 35 096	R 36 500	R 168 989
MES	R 12 480	R 12 979	R 13 498	R 14 038	R 14 600	R 67 596
Community responsibility	R 12 480	R 12 979	R 13 498	R 14 038	R 14 600	R 67 596
TOTAL	R 149 760	R 155 750	R 161 980	R 168 460	R 175 198	R 811 148

Communication

The focus will be on communicating with the members and property owners of the WCID on:

- Maintaining an informative website.
- Distributing WCID flyers and/or newsletters reflecting the initiatives and successes of the WCID.
- Promote community pride through the initiatives of the WCID in making the area cleaner and safer.
- The use of the various WCID WhatsApp groups which have proven to be very effective and allow the WCID residents to actively share and contribute to the community efforts and spirit on an ongoing basis.

Financial Impact of the Welgemoed CID

The Expenditure Budget for each year of the Business Plan:

T2 Budget 2025-2030	Total WCID Expenditure	REVENUE (Funding Source: Additional Rates)	% INCREASE IN ADDITIONAL RATES REQUIREMENT	Accumulated Surplus	Other income
Year 1 - 2025 - 26	5 899 090	-4 474 929	7,25%	-900 000	-524 160
Year 2 - 2026 - 27	5 614 377	-4 569 251	2,11%	-500 000	-545 126
Year 3 - 2027- 28	5 626 613	-4 859 681	6,36%	-200 000	-566 931
Year 4 - 2028 - 29	5 758 708	-5 169 099	6,37%	-	-589 609
Year 5 - 2029 - 30	5 945 929	-5 332 736	3,17%	-	-613 193
Total	28 844 717	-24 405 697		-1 600 000	-2 839 020

In line with the City's CID By-law, the Welgemoed CID Management Body is required to prepare a proposed annual budget for each successive financial year by the date and in the format required by the Executive Director based on the specific needs of the area as set out in the Business Plan. The budget is funded by an additional property rate levied on the municipal valuation of all properties within the CID boundary. Additional rates attract VAT @ 15%.

The property rate is calculated by the City annually during the City's budget process. The additional rate is expressed as a Rand-in-the-rand and is calculated by dividing the budget total with the total municipal valuation of properties in the CID.

The impact on individual property owners in the outer years of the CID term may vary due to valuation fluctuations caused by successful valuation objections, subdivisions, new developments, court amendments, implementation of a new General Valuation or Supplementary Valuation causing the CID budget to be spread over an increased or reduced total municipal valuation base.

The CID By-law allows for differentiated additional rates between categories of rateable property and as such a residential and non-residential additional rate is applicable in the CID.

Property owners who receive a full or partial rates rebate will not pay additional rates.

The budget and additional rates` are approved by Council with the City`s budget and is applicable over a financial year, which starts on 1 July.

Individual contributions for residential and non-residential properties can be calculated as follows:

1. Municipal valuation x R 0.XXXXXXX = Annual contribution (VAT excl.) – Note: R 0.XXXXXXX represents the approved ID additional property rate.
2. Annual contribution (VAT excl.) ÷ 12 = Average monthly contribution (VAT excl.)
3. Average monthly contribution (VAT excl.) x 1.15 = Average monthly contribution (VAT incl.)

Proposed Management Structure

The Welgemoed CID NPC is a non-profit company established in July 2020 with a board of directors as elected per AGM by its members. The entity has no owners with a private interest, merely members that govern the operations according to the CID By-law (2023) and the CID Policy (08 December 2022).

All property owners within the Welgemoed CID boundary are eligible to register as members. Membership forms are available on the Welgemoed CID website. Communication about membership is communicated to residents biannually via email and WhatsApp groups

Current Directors of Welgemoed CID NPC

- Francois Laurence - Chairperson - elected in 2020 by AGM members
- Renaldo Lorio - Vice Chairperson - elected in 2020 by AGM members
- Louise Ferreira - Director - elected in 2020 and re-elected in 2022 by AGM members

- Chris van Rooyen - Director - elected in 2020 and re-elected in 2022 by AGM members
- Hessel Turkstra - Director - elected in 2023 by AGM members
- Abie Fortuin - Director - elected in 2023 by AGM members

An Annual General Meeting will be held every year to:

- Review the performance of WCID (in relation to the committed business plan)
- Confirm the mandate of its members
- Note the audited annual financial statements
- Appoint registered auditor
- Elect directors

Operations of the WCID will be managed by a WCID Manager who will report to and be managed by the Board of Directors. Individual performance reviews will be held bi-annually at all levels of the organisation, including the manager, aligned to the organisational review timeline.

The manager will update the Board of Directors on a monthly basis regardless of scheduling of Board meetings.

- At the Annual General Meeting at the end of the year, an election process will determine the WCID Board of Directors according to the current MOI.
- All Welgemoed residents are invited to partake in the public board meetings with prior submission of discussion points to the Board as per MOI clause 16.6 para 16.6.6. Notices of these meetings, with the agenda, are posted on the Welgemoed CID website, Facebook page, and WhatsApp groups two weeks in advance. Minutes for meetings can be found on our website.
- The WCID operations report back monthly on the financial performance according to the CID policy and the municipal finance structures.

The WCID staffing and contract's structure is illustrated below:

The WCID manager reports to the WCID NPC Board of directors as elected by the members at the AGM.

Management functions:

The following management functions will be fulfilled:

- Manage and maintain with the City of Cape Town CID office: ensure compliance to City of Cape Town reporting requirements (financial reporting, implementation plans, budgets- annual mid-year reviews, plans and budgets), attend all CID meetings, and provide ad hoc reports as requested.
- Finance management: ensure compliance with generally accepted accounting practice for non-profit companies in respect of cash management, procurement, creditors and debtor's management, preparation of management accounts, adherence to budget, financial record keeping, annual audit protocols, annual financial statements, asset registers, investment and call account management and related.
- Maintenance of performance review system for all activities of WCID
- Preparation and submission of all reports to agreed timelines: City of Cape Town, Board of Directors, member reports and others.
- Ensure that CID complies with all legislative requirements as regards term renewal, Companies and Intellectual Property Commission (CIPC) requirements, tax and VAT.
- Participate proactively in various meetings as and when requested to do so by partners, other CID's, City of Cape Town, service providers and Board of Directors.
- Maintain appropriate office systems and functionality: IT infrastructure (hardware and software), shared drives, data management, telephony, printing, internet, and time and attendance systems.
- Ensure that HR systems and practices comply with legal and best practice frameworks – recruitment and selection, employment contracts, leave administration, employee files, working hours, overtime management, job descriptions, performance reviews, training and development, misconduct and incapacity management processes.

- Ensure adherence to Memorandum of Incorporation (MOI) and sound CID membership practices, including but not limited to processing of membership applications, coordination and management of AGM and related.
- Ensure community complaints and reports are addressed and attended to and feedback given as appropriate.
- Complete annual review of policies and procedures manual with Board input to ensure continued relevance, effectiveness and suitability.

Measures to ensure inclusivity:

The WCID's communication programme will ensure that the community is kept aware of WCID programmes and projects and are encouraged to engage with the WCID on a regular basis.

Property owners within the WCID boundaries will be encouraged to apply to become members of the WCID so that they can exercise their rights and influence the business of the WCID. The WCID publishes a schedule of dates of upcoming Board meetings on the website and encourages community members to attend open meetings.

Financial and performance reporting requirements vis-à-vis the City:

The WCID will comply with all reporting requirements of the City of Cape Town's CID Branch, inclusive of the submission of monthly progressive income and expenditure reports, annual budgets and implementation plans, half-year reviews as well as the submission of Annual Financial Statements, proof of CIPC compliance, SARS returns and notices and draft minutes of Annual General Meetings.

Following its AGM, the WCID will also submit its Annual Report and audited Annual Financial Statements to the local sub council to comply with the political oversight function.

The Manager, in acting in the best interests of the WCID will report in writing to the board of directors and the City any serious or persistent financial problems experienced by the WCID, should it occur.

The board of directors will promptly report in writing to the City any irregular or fruitless and wasteful Expenditure. The board of directors must also report any irregular expenditure or other loss resulting from real or suspected criminal conduct.

The Manager will report to the City any interference by a councillor outside of that councillor's assigned duties, relating to the financial affairs of the WCID or the responsibilities of the board of directors.

Permissible Amendments to the Business Plan without Further Consent

If a determination is made to affect a material alteration to the geographical boundaries of the CID, such alteration shall be implemented in accordance with the formal process in Section 26 of the CID By-law. If an amendment to the geographical boundaries of a CID is deemed non-material and does not alter the terms of liability or the quantum of the additional rate levied, such amendment shall be undertaken in compliance with Section 25 of the City Improvement District By-law.

Where additional services are necessitated through collaboration with municipal departments, and such services are not expressly provided for in the motivation report but is deemed as enhanced and/or supplementary municipal services, the business plan may be amended without further consent, provided that the amendment is non-material and the process prescribed under Section 25 of the City Improvement District By-law, 2023 is duly followed.

The WCID is currently not envisaging any significant changes to its geographical boundaries, strategy or operations and therefore no other such actions are noted here. Should any significant changes be proposed, such changes will be subject to approval of the members of the WCID at an Annual or Special General Meeting.

List of all Rateable Properties within the CID

A list of all the rateable properties within the WCID is attached as Annexure A.

	WELGEMOED CITY IMPROVEMENT DISTRICT (WCID) 5 YEAR IMPLEMENTATION PLAN 1st July 2025 to 30th June 2030

COMMMENTS RECEIVED ON THE AMENDED T2 BUSINESS PLAN FOLLOWING AGM APPROVAL ON 4 NOVEMBER 2025

The following Submission was drafted by 1 person () and signed by 26 people						
No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
1			WCID Strategic Objectives (page 3 - 4) "3. Greening – rehabilitation of [local] indigenous plants, general maintenance and upgrade of parks and green areas, creating cross-generational common spaces." (p.5) - The qualifying word, "local", is deleted from the term "local indigenous". - Material amendment which broadens the scope from plants that are indigenous to the WCID area to generic indigenous plants, i.e. plants that are indigenous to South Africa.	No	The T2 business plan puts focus on the endemic planting and the objective to restore / rehabilitate these plants. Although the plan states such focus it does not purport to convey a message that only Renosterveld plants will be planted. Although no mention is made of indigenous plants in the T2 business plan it cannot be interpreted to restrict such planting. The amendment to the business plan was percipitated when a minority group wished to contend that only Renosterveld is to be planted and nothing else. This absolute exclusivity was never intended and when the question was asked the answer had to be no. It is perhaps necessary to mention that nobody knew (and to some extent still don't know) what to expect regarding the visual appearance of these endemic plants. This is to be expected since these plants are to be reintroduced. However, when this planting started to take place the results were not pleasing to some. This resulted in requests to consider other indegenous plants. Amending the business plan to broaden the plant selection is not a material amendment to the business plan since the business plan does not expressly (or by implication) exclude such other indegenous plants. The objective to rehabilitate and restore the endemic plants, and thereby improving the biodiversity, is retained in the amended business plan. See also par. 15 in attached document.	
2			<u>Environmental Management & Development</u> - Introduction This section was deleted in its entirety. - Material amendment which removes key concept of "rewilding" – which has improved biodiversity at is core - as a proven, successful urban renewal strategy. - Removes reference to improvements of this strategy which have been demonstrated by studies. - Removes reference to key aspects of "rewilding", i.e. "restoring and managing biodiversity in urban landscapes."	No	Although the images in the document, which contain the relevant text, were removed the essence of "rewilding" remains. There are designated areas within the defined area where these endemic plants will be prioritised. The associated benefits are still achievable in these areas. As is shown in the attached document a limited area (1,483 square meters) has been planted to date using endemic plants (Renosterveld) and there is arguably more space avaiable than what the group of volunteers would be able to plant during the currency of the T2-plan. 24,331 square metres is designated which can possibly be extended by 1,114 square metre to include the batter of the newly constructed Jip De Jager carriageway (depending on the City approval). Admittedly 100% coverage in these areas will not be possible but there is at least 10 times more space availbale than what has been planted to date. Rewilding is not effectively removed. Therefore this is not a material amendment to the business plan. See also par .22 in the attached document. Although referred to as rewilding the emphasis lies on the endemic plants and matters pertaining to aesthetics and plant size cannot be ignored. The appropriate plants need to be selected for the area in which it will be used.	
3			Amended by substituting the original text for the following amended text: "Building upon the foundational achievements of the first term, our focus for the second five-year term will be on enhancing the community impact of our organisation through the strategic upgrading of Goewerneur Park, the continued rehabilitation of local indigenous plants in specified areas, and applying a broader indigenous planting approach in the more active and used areas by residents in the Welgemoed area... to deepen community engagement... and preserve local biodiversity in dedicated areas." (p. 14) - Material amendment to make "broader indigenous planting approach" the default/ preferred option. - Amendment removes concept of "stepping stone" habitats as part of the interconnected network of the Public Open Spaces & road verges. - While amendment professes to "continue" with the "rehabilitation of local indigenous plants", it is misleading inasmuch as there is:	No	As noted in line 4. To expressly incude that which was not expressly excluded does not constitute a material amendment to the business plan. Although the concept of "stepping stone" habitats is removed from the business plan it does not mean that it will not take place. The fact that the endemic planting (restoration of the Renosterveld) is confined to designated areas does not obliterate the stated objective as proposed under the concept of "stepping stone" habitat. It is after all the planting of the endemic plants that provide substance to what is referred to as a stepping stone habitat. The amendment does not remove the rehabilitation of local indigenous vegetation (endemic planting) and hence does not materially affect the business plan. The statement regarding the size of the "defined" area is incorrect. Similarly the statement regarding the corridor function i.e. ecological connectivity. In this regard please see attached document (see par 22 andpar. 24.1).	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
4			• No acknowledgment that the so-called “designated” areas for plants indigenous to WCID represents a +/- 80 - 90% reduction in the areas previously available and/or designated for such urban rehabilitation under the approved business plan; • No acknowledgment of the corridor function inherent in the term “stepping stone habitats”, where there is no objective evidence that the limited designated areas under the amendment would still be capable of performing the corridor function (i.e. characteristics of site selection & proximity to each other, natural remnants and/or connecting features such as streams etc.) • No objective evidence to support the claim that Swartland Shale Renosterveld is not appropriate or practical for “more active and used” areas.		statement under the last bullet point does not assist to determine whether the amendment to the business plan is material or not.	
			<u>“Benefits of Urban Habitat Restoration”</u> Deleted in its entirety. “Benefits of Urban Habitat Restoration” See page 15, which summarises these benefits under the following main headings: “Safer with less crime”; “Biodiversity Education & Awareness”; “Sense of Community”; “Improved mental health”; “Improved physical health”; “Improved childhood development” and “traffic calming effect”. - Removes references to the various benefits of urban habitat restoration/ rehabilitation, which have been borne out by peer reviewed studies.	No	This comment does not speak to whether the amendment is material or not. However, these outcomes are not dependent on a singular approach of urban habitat restoration or “rewilding,” and can be achieved through a variety of integrated environmental and urban management practices. The deletion of this summary section therefore does not constitute a material amendment to the business plan. See also par. 24.3 in attached document.	
			<u>“What does our regreening strategy entail?”</u> Deleted in its entirety. - Removes the core principles underpinning the EMD service, namely a service which prioritises urban rehabilitation with real conservation goals in the context of the Cape Floristic Region. - Removes the causal link between improved biodiversity of public open spaces and the various direct and indirect benefits thereof (indirect benefits include sense of community, increased use and enjoyment of spaces, natural playscapes; improved wellbeing, improved public safety). - Falsely claims that the same direct and indirect benefits will accrue from a “generic indigenous” approach (with small pockets of Renosterveld in a limited number of “designated areas”).	No	The removal of this section does not do away with the conservation goals in the context of the Cape Floristic Region. The conservation goals are to be achieved within the designated areas and the benefits claimed remain achievable in these areas. The casual link claimed is therefore not removed. The designated areas fall within the defined area. The last point is a misdirected. More area is available for endemic planting than indigenous planting. This does not constitute a material amendment to the business plan. Whether the proclaimed benefits are only linked to the endemic planting is by no means certain and hence would not satisfy the <i>conditio sine qua non</i> test.	
			<u>CORE SERVICE: ENVIRONMENTAL DEVELOPMENT</u> Deleted in its entirety - Removes reference to the protection and reintroduction of Renosterveld as the main strategy to achieve the objective of improved biodiversity. - Removes the reference to the concept of “fragmentation” in the context of public open spaces. - Removes the reference to alien invasive species in the context of outcompeting endemic/ indigenous species to the WCID.	No	This statement is not correct. The protection and reintroduction of the endemic plants (Renosterveld) remain part of the business plan. The second and third point deals with specifics which does not indicate any material amendment to the business plan.	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
5			<u>"Key Targets – Stepping stone habitats"</u> (p. 17) Amended by substituting the original text for the following amended text: "Designated Planting Zones (A: Indigenous-Dominant Areas; B: Endemic-Dominant Renosterveld) Areas Developed by WCID; C: Naturally Occurring Endemic Zones)... [providing site lists for each category." (pp. 17–18) - Removes key target of planting "at least 1 stepping stone garden per WCID zone each year" – i.e. 4 stepping stones per year in total (WCID is divided into 4 zones). - Reduces the number of existing no-mow areas from 5 to 2 (all formal parks now "indigenous dominant areas"; and also precludes the expansion of no-mow areas to additional sites. - The designation of the new planting "zones": • Took no, alternatively inadequate, consideration to the factors considered under best practice guidelines when choosing stepping stone habitats and no-mow areas (connectivity, rehabilitation potential etc.) • Instead, designation was made on wholly subjective grounds, taking into account only/ mainly personal aesthetic preferences and unscientific biased views on the appropriateness of Renosterveld in public open spaces.	No	The City determines which areas are mowed and which areas are not. This is not under the WCID's control. The City sends their mowers when they send their mowers. This does not comprise a material amendment to the business plan. While the terminology "stepping stone habitats" have been removed it does not mean that the objectives thereunder is done away with (see arguments above). KPIs can still be set in the implementation plan. This does not comprise a material amendment to the business plan. The last two bullet points are subjective statements. This does not comprise a material amendment to the business plan.	
6			<u>"Key Targets – Environmental Education"</u> (p. 17) Amended by substituting the original text for the following amended text: "Key Actions – Community Engagement: Volunteer planting initiatives; educational signage and guides on local flora; encourage resident participation in monitoring and light maintenance." (p. 19) - Removes core element of environmental education. - Waters down "environmental education" to little more than "educational signage and guides on local flora". - Removes KPI of holding at least one of the listed community events per term (i.e. minimum of 4 times per year). - The reference to "planting initiatives" & "residential participation in monitoring and light maintenance" is meaningless, in circumstances where – • the 80-90% reduction in the rehabilitation/ stepping stone habitat sites mean that - i. the amount of Renosterveld to be propagated will be minimal, alternatively materially reduced; ii. the number of sites available for enviro education and community participation in meaningful biodiversity and conservation activities/ projects will be minimal, alternatively materially reduced; • The clear preference of the board (as proponents of the amendments) is to outsource the environmental management service; and • There is no objective evidence that residents will be willing to volunteer to plant and/or maintain generic indigenous plants which have little to no biodiversity and conservation value.	No	Environmental education and engagement are not delivered as formal institutional programmes with fixed delivery obligations, but rather as supportive initiatives that may be undertaken in partnership with residents and stakeholders on an interest-led basis. As such, the inclusion of fixed performance indicators (KPIs) for volunteer-dependent activities is not appropriate, as participation levels cannot be predetermined or guaranteed. The amended wording does does not comprise a material amendment to the business plan. The fist bullet point is factually incorrect (see attached document par. 22) and consequently so are the subitems. The last two bullet points are subjective statements and irrelevant as to the materiality of the amendment. The amended wording does not comprise a material amendment to the business plan. See also par. 6 in attached document.	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
7			<u>“Key Targets – Don’t mow, let it grow”</u> (p. 17) Amended by substituting the original text for the following amended text: “Key Actions – Monitoring & Maintenance: Conduct regular maintenance... Use sustainable irrigation and mulch-based moisture retention; Support biodiversity through active seasonal area management.” (p. 19) We reiterate what we have said above in respect of no-mow sites & natural remnants. - The claim of “sustainable” irrigation is meaningless, contradictory to the “preferred generic indigenous” strategy and not supported by any objective evidence. That is so, because: • Generic indigenous/ hybrid plants that are not indigenous to the WCID areas are very likely to have different watering requirements, requiring more water and/or irrigation during summer months; . • Because “aesthetics” are the main consideration under the preferred generic indigenous strategy, planting will not be focussed on improving the ecological functioning of any area, meaning that the need for irrigation will not reduce over time as the plants become more established. - Claims of “sustainability” ignore the fact that – contrary to Renosterveld plants – generic indigenous/ hybrids is highly unlikely to support specialist pollinators that are indigenous to the WCID area. At best, generic indigenous plants may support generalist pollinators, albeit that even that claim has not been demonstrated or quantified with reference to any objective information.	No	The claims under this item are subjective statements and do not assist to determine whether the amendments to the business plan are material or not. As noted above the improvement of the biodiversity and the related benefits pertaining to sustainability, ecological functioning are still achievable in the designated areas. There is sufficient space for this interest group to advance the objectives under biodiversity, in fact, as noted above the available space is perhaps beyond their ability and capacity to utilize to the full (see also par. 22 of attached document). The fact that there may be indigenous plants that require more water does not in itself comprise a material amendment to the business plan.	
8			<u>“Key Targets – Monitoring”</u> (p. 17) Amended by substituting the original text for the following amended text: “Key Actions – Monitoring and Maintenance of parks and public open spaces: Conduct regular maintenance... pruning, weeding, mulching; sustainable irrigation; citizen participation in light maintenance and monitoring.” (p. 19) - We reiterate what we have said above in respect of no-mow sites, natural remnants. stepping stone habitats and resident participation.	No	The responses provided above apply equally in this instance as it regards no-mow, natural remnants, etc. This amendment to the text of the business plan is not material.	
9			<u>“Key Targets – Maintenance & Alien hacks”</u> (p. 17) Amended by substituting the original text for the following amended text:??????? - The amendment has removed all references to alien clearing and alien hacks. This is indicative of the change in focus, where the main focus is on aesthetics and not the rehabilitation and environmentally friendly management of public open green spaces. - Moreover, in practice, the WCID has already implemented the new “preferred generic indigenous” policy in a manner that indicates that planting choices are not informed by whether these “generic indigenous” species may pose a threat to the neighbouring Tygerberg Nature Reserve or natural remnants/ existing stepping stones in the WCID areas. A recent planning project at the so-called Welgemoed Welcome Garden (the “WWG”) • Removed all Renosterveld from the existing WWG site (less than 30% of which were successfully relocated to the other stepping stones); • Replaced existing Renosterveld species – i. with the same species, which had been purchased from wholesale nurseries (i.e. replaced local stock with stock which most likely comes from a different gene pool than the local TNR gene pool) and/or hybrids; ii. with species from Australia, although the WCID project team claimed that the species were “indigenous” iii. with generic indigenous species from different rainfall areas (i.e. different watering requirements), and even proposed to plant a vygie species from the Eastern Cape that becomes invasive in the Western Cape, until the former director of Greening (who had been excluded from the WWG project) pointed this out after she had demanded to see the proposed species list (this indicates lack of knowledge of project team and contractors, where knowledge of the local vegetation type and threats to this habitat is no longer a priority)	No	These are subjective statements and hence irrelevant in the consideration of whether the changed wording comprise a material amendment. The maintenance work that was previously undertaken is still undertaken and alien vegetation is still being removed. It is further contestable whether the indigenous species to be planted in the areas designated for predominantly indigenous plants will pose a threat to the plants in the Tygerberg Nature Reserve. It is to be noted that the majority of plants in the defined area are situated in private gardens. These gardens contain a large number of indigenous and exogenous plants and has been in close proximity to the Tygerberg Nature Reserve for many years, at least more than four decades. To contend that the introduction of a few more indigenous type plants will pose any greater threat, if there is one, to the plants in the Tygerberg Nature Reserve is speculative. The amended business plan makes provision for designated areas where the endemic Renosterveld plants can be planted. In these areas the endemic plants can be sheltered against other species falling outside of its biome (to the extent possible) as well as differential water requirements.	
10			<u>“Key Targets – Wood waste into mulch”</u> (p. 17) Deleted in its entirety. - This deletion is material, given that this means a substantial amount previously budgeted for the mulching project will now be used for something else.	No	The removal of the image on page 17 inadvertently removed the reference to the mulching project. The associated budget to purchase the equipment remains intact. There is no intention to use this funding for something else. On page 19 there is reference to mulching. Therefore, this does not comprise a material amendment. See also par. 24.6.	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
11			<u>PROJECT: GOEWERNEUR PARK UPGRADE</u> (extent of the amendments make direct comparison difficult) - pages 18-19 <u>Objective</u> "The primary goal is to transform Goewerneur Park into a vibrant, multi-functional community space that offers recreational, [educational] and social benefits. The upgrades will address existing infrastructure needs, improve accessibility, and incorporate sustainable practices. - Removes "educational" benefits from the stated core objectives of the Goewerneur Park Upgrade, which confirm what we have stated above regarding the departure from the previous focus on the importance of environmental education and the use of stepping stone gardens and upgraded parks as spaces for "outdoor classrooms" and guided flower walks.	No	The removal of the educational aspect from the Goewerneur Park development does not mean that it is removed entirely from the business plan. As noted above in line 12, educational type activities will continue as the opportunities arise. This is not a material change.	
12			<u>Timeline</u> (p. 18-19) Deleted in its entirety. - The deletion of "community well-being and environmental health", underscores the material departure from the existing strategy to secure the widely acknowledged direct and indirect benefits of improved biodiversity and community conservation projects, including improved physical and mental well-being of residents. - The deletion of the phrase: "the advancement of the rehabilitation of indigenous plants in the [WCID] in order to create a "more connected and sustainable community" is revealing, inasmuch as it signals that - • There is no longer any meaningful commitment to the improvement of biodiversity through the protection and reintroduction of species that are indigenous to the WCID and the creation of ecological corridors. • References to "sustainability" and "biodiversity" which remain in the amended text constitute little more than greenwashing, which is manifestly apparent when regards is had to misleading statements about Renosterveld in the urban context.	No	These are subjective statements and irrelevant in the consideration of whether the changed wording comprise a material amendment.	
13			<u>Cost</u> Deleting all references to the appointment of a junior manger. - This confirms the undisclosed intention of the board majority to outsource most, if not all, of the greening services.	No	The objector speculates over the perceived intentions of the board. This is irrelevant. The board is empowered to make operational decisions regarding staffing, etc. This deletion does not materially amend the business plan. See also par. 8 in attached document. The implementation plan provides for outsourcing if so required. This provision remained unchanged.	
14			Amended by deleting the detailed cost table from the EMD section (financial detail omitted in amended business plan). (pp18-19)	No	The detailed table has not been removed - it can be found on page 21 of the Amended Business Plan. No changes in terms of cost provision for the EMD section have been made.	
15			<u>[NEW] "PLANTING STRATEGY FOR PARKS AND PUBLIC OPEN SPACES"</u> AMENDMENT (NO EQUIVALENT IN THE APPROVED BUSINESS PLAN) Insertion: Objective (page 16) - Refers to planting strategy adopted by the board on 22 April 2024; - Cites alleged objectives, including making spaces "attractive" and achieving a balance between "environmental sustainability, aesthetic appeal and functionality". - States that the planting approach will follow "a more "inclusive indigenous and endemic planting framework"		These are subjective statements and do not convey in any meaningful way how the expansion of plant type, to include indigenous plants, whilst retaining focus on endemic planting, constitute a material amendment to the business plan. The objectors fail to see what opportunities still exist to advance urban renewal in the way they wish to see it. In line 30 below it is noted that the objector argues that the endemic planting will be more cost effective than indigenous plants and indicate that it is so because it is largely based on volunteer effort.	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
16			Insertion: <u>"Strategic approach"</u> (page16) - Four stated strategic objectives: Prioritising indigenous South African species, including locally endemic Renosterveld plants "where feasible"; Balancing ecological restoration with community usability; Supporting biodiversity; and Integrating community engagement. The phrase "[use of] endemic Renosterveld species where feasible" is problematic for two reasons: • It reveals a fundamental misconception of the term "endemic" versus "locally indigenous" or "indigenous to the WCID area"; and • It is grossly misleading, as the caveat "where feasible" obfuscates the reality that the new planting policy and decisions which the board majority have already made in 2025 to implement the new policy have set out (deliberately) to ensure that the planting of Renosterveld will rarely be "feasible", including but not limited to - i. The refusal to order plants from the rehabilitation expert in 2025 to ensure the availability of new plants in 2025/2027 (the rehab expert only has stock of the species plants which the WCID ordered for Goewerneur in 2024, because the board does not understand the concept of succession planting or that some species take longer than 2 years to propagate). ii. The board majority's failure to engage in any consultation with the Greening volunteers, resulting in long-term damage to the trust relationship. iii. The board's undisclosed decision to outsource the greening services, which means that it will be almost impossible for the WC ID to create, nurture and maintain any volunteer network. - The claim that the approach seeks to "support biodiversity" is meaningless greenwashing. This is apparent from the stated means by which this will be achieved, namely "through the active seasonal area management". • Undefined "management" cannot improve the ecological functioning and biodiversity of an area if, the plants - (i) are not indigenous to the WCID area and/or adapted to the local soil and climate; (ii) do not support local pollinators; (iii) do not improve the micro-biome; and (iv) improve the ecological functioning of the area. • No objective evidence is provided for any of the statements/ claims. - The claim that this strategy will allow "greater diversity" in plant selection and park design have no basis whatsoever in fact. That is because: • It is a well-known fact that the species list of local wholesale "indigenous" nurseries is very limited, as they focus on commercially viable species (let alone that many of the species are hybrids and/or would not thrive in the clay soils of the WCID) • In contrast, over the course of the last four years, WCID greening (under its previous leadership) managed to increase the number of Renosterveld species propagated through partnerships with local experts and community volunteers from about 25 – 30 species in 2021/22 to +/- 130 species in 2024/5. Given the additional collection sites secured by the WCID and the growing in-house expertise of volunteers, this increase in species availability for rehabilitation meant that the annual increase in 2025 – 2030 would have been exponential.	No	By the objector's own admission the success of the endemic planting is highly dependent on the input of the volunteer group (this interest group). If the rehabilitation and restoration of the endemic planting was as important to them as they proclaim it to be then one would expect that they would still size the opportunities which are available in the designated areas. To throw in the towel with the first difficulty does not create the impression of an interest group who wish to advance their objectives (this contestation aside). As noted the designated areas are not as small as the objector indicates and would present the opportunity to realise the benefits they proclaim it will bring. In this way they can advance their objectives and the naysayers can perhaps warm to the restoration initiative if the results are pleasing. Although one could argue that the volunteers can continue to do what they wish to do without WCID's involvement, the reality is that they require funding from WCID. The restoration of the endemic plants was made part of the T2 business plan with the knowledge and understanding that the volunteer group will play a significant role in this function to foster community involvement and a sense of ownership. This requires that there must be a symbiotic relationship between them and the WCID, which is not the case at present. The interest group wants to dictate what is to happen and WCID must just comply. This is not a workable situation and the WCID members have indicated such at the November 2025 AGM when the decision was taken to apply for an amendment to the business plan. See also par 24.7 of attached document. It is important to repeat that the amendment of the business plan does not hinder the restoration of the endemic planting, it just confines it to designated areas. The rest of the business plan remains unchanged. It is therefore not a material amendment (see line 4)	
17						

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
18			Insertion: “Rationale for the inclusive indigenous approach” (p 17) - Five-point rationale (aesthetic/functional value; community feedback; practical considerations; governance alignment; ecological integrity). <u>Aesthetic Appeal & Functional Value</u> - We reiterate what is stated above regarding the weight of “aesthetic appeal”; - The claim that this “new” approach will improve the “aesthetic and functional value of POS is not supported by any objective evidence and is a view that is not shared by experts. - The landscape architect responsible for the Sluysken Park upgrade (Timothy Snyders) and consultant botanist, Rupert Koopman, as well as independent experts such as Marijke Hönig (botanist, designer of Green Point Park biodiversity garden) and Dr. Ernst van Jaarsveld (Horticulturist at Kirstenbosch for some 42 years, now resident horticulturist at Babylonstoren) have all expressed the view that Sluysken Park is a remarkable demonstration of what a committed community can achieve in the urban rehabilitation and conservation context, as well as a showcase for how Renosterveld can be used in public open spaces and formal parks. They do not share the view that Renosterveld has “insipid flowers” (a view expressed by the main proponent of the new planting policy), that Renosterveld is “dull/ vaal”; “bossieagtig/ bushy” and does not meet the aesthetic standard expected by residents. - Notably, there are no documents or information obtained from independent experts to support the views set out in the proposed amendment. Rather, the views are those of individual board members - none of whom have any expertise or experience in environmental management, biodiversity, rehabilitation, landscape architecture, conservation or local habitats (Swartland Shale Renosterveld and Cape Flats Sand Fynbos).	No	These are subjective statements and do not convey in any meaningful way how the expansion of plant type, to include indigenous plants, whilst retaining focus on endemic planting, constitute a material amendment to the business plan. As noted in line 4 some individuals did not find the aesthetics of the endemic plants (Renosterveld) appealing. One does not need expert opinion or objective evidence to determine whether something is visually appealing or not. Beauty is in the eye of the beholder. To advance an argument on the basis of environmental management, biodiversity, rehabilitation, landscape architecture, conservation or local habitats do not rescue the situation if all these aspects are still achievable in the designated areas. See also par. 15 in attached document.	
19			<u>Community Feedback</u> - It is grossly misleading to motivate the amendment on the basis of “community feedback” – • The board majority did not seek any prior input from the 50 – 80 residents who have actively participated in rehabilitation projects and workshops between 2021 – 2025; • In the weeks leading up to the board meeting on 22 April 2025 where the new policy as adopted, only 7 complaints were provided to the then directors (). As reflected in the written report that served before the board on 22 April 2025 (“the EMD report”) (Annexure “A” to this objection), reported the results of his personal discussions with the objectors: (i) most of the comments pertained to the WWG and not necessarily Renosterveld in particular; (ii) 6 of these 7 complainants expressed understanding for the operational obstacles faced by the greening portfolio in respect of the maintenance and management of the WWG and was willing to give the greening portfolio an opportunity to implement the identified remedial measures; and (iii) only 1 of the 7 complainant remained unresolved, given that the complainant refused to meet or speak with .		Reference to the board decision on 22 April 2025 and how the change came about is irrelevant. Reference to the number of complaints and how they were received are equally irrelevant in the context of the amendment. This is so since the entire matter was put the members at the November 2025 AGM where the members resolved by majority vote that an application is to be made to the City to amend the business plan as presented. These particular objections do not assist regarding whether the amendment of the business plan is a material amendment or not.	
20			When the WCID chairperson motivated the new planting policy at the August 2025 public board meeting on the basis of “public demand” a significant number complaints, greening volunteers submitted requests for information (including PAIA requests) in respect of the alleged “public demand”. In response, the WCID chairperson could not provide a register of these complaints (redacting any personal information), and claimed that there had been 16 complaints (which include the 7 complaints referred to above) and “numerous” conversations and telephone calls between residents and the WCID manager/ directors. However, the chairperson conceded that no records were kept of these “additional” complaints. This means that the WCID did not follow any complaints process (required under the CID Policy), which also undermined the ability of the then director(s) of the Greening Portfolio to deal with any of these alleged complaints; • The board did not conduct any survey or public meetings in this regard; • The complaints register which the WCID is required to publish on their website do not record any of these complaints (the register only includes complaints after the new greening policy was adopted); • When making these public statements at the August public board meeting or preparing the amendment documents, the WCID board did not acknowledge any of the positive comments and comments of support of the original greening strategy, as evidence by the large majority of the residents who submitted responses to the Sluysken park online park survey (early 2024), as well as the public meeting regarding the Sluysken park project, where all of those present (more than 50 people) made it clear that no-one had any objection against the Renosterveld rehabilitation approach;	No	The statement “ ... <i>acknowledge any of the positive comments and comments of support of the original greening strategy, as evidence by the large majority of the residents who submitted responses to the Sluysken park online park survey (early 2024)</i>”, is contestable. See par. 14 and 24.4. in attached document. In addition the survey was undertaken in March / April 2023 and not in early 2024. The outcome of the survey was not so overwhelming positive and 82 response (with some duplicates from households) out of 1446 properties is arguably not statistically significant. Last bullet - The number of complaints received is irrelevant as noted above.	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
21			The former greening directors have confirmed that – over and above the 7 complaints referred to above – they were only given an excel spreadsheet with some 4- 5 complaints which could be construed as complaints about the no-mow areas and visual aspects of the stepping stone areas, but that this excel spreadsheet did not contain dates or names (as the individuals allegedly did not want to give their names).			
22			<u>“Practical considerations”</u> - There is no objective evidence to support the claim that “exclusive Renosterveld” plantings have “proven difficult to manage in urban park environments”. The WCID has not provided any evidence to this effect by experts and this statement is based on the views of laypersons who appear to hold biased views as to Renosterveld and/or simply do not understand the practical challenges of any new planting in degraded public open spaces. - The main challenge as far as maintenance is concerned is: (i) soil compaction & poor soil quality as a result of the mowing regime; (ii) the extremely dense and persistent seed bank of alien invasive species and invasive weeds in POS and road verges; and (iii) the highly degraded state of most POS (most POS do not have natural remnants; those remnants which survived are highly disturbed) - Generic indigenous species do not have lower maintenance needs. Indeed, while maintenance is high when rehabilitation stands establish themselves in the first 0-2 years (mainly due to eradicate/control invasive alien species/ invasive weeds), the maintenance burden is reduced significantly from year 3 onwards, as the microbiome is improved and the Renosterveld pioneer plants become established. - From a park management point of view, Renosterveld does not only result in reduced maintenance costs, but is also significantly less expensive than traditional landscaping with generic indigenous species. As set out in the EMD report (annexure A) at para 8.3 – 8.4: • The establishment costs of Renosterveld are 10 times less per square metre than a traditional generic indigenous approach (the same would hold true for the cost of replacement planting/ succession planting); • The long-term maintenance cost of Renosterveld is also less than that of a traditional generic indigenous approach, because: i. Once established, Renosterveld does not require irrigation and are better adapted to survive droughts or lower rainfall levels. If irrigation is required in summer due to short/poor winters, irrigation may only be required once a month (deep, long watering, preferably when it is overcast/ raining/ lower temperatures). This is particularly relevant, given that - (i) the CoCT pays for the water use of public open spaces and road verges under irrigation; not the WCID; and (ii) water restrictions (which are likely given recent climate change models) mean that planted areas are more likely to survive when irrigation of POS and road verges are prohibited. ii. A more diverse species list means that a landscape architect can select plants that are suitable for different areas within the same park; iii. Because Renosterveld species are adapted to local conditions, they are more robust and able to withstand recreational impacts. iv. Natural seed dispersal due to improved ecological functioning (already observed in WCID stepping stones that were planted in 2022/3) means that planting areas will become self-sustaining, reducing the need for replacement planting. Costs and maintenance will then be limited to succession planting, when new and apex species are introduced to the area in the medium- to long-term. v. After 2 years, maintenance needs (& attendant costs) of Renosterveld are reduced significantly.	No	These are subjective statements and do not assist in determining whether the amendment to the business plan is a material amendment or not. The statement regarding the difficulty to manage these plants stem from first hand experience in the areas where these plants were planted. Some of the endemic species grow to become fairly large shrubs which require regular pruning to keep them suitable for the areas in which they were planted. The endemic plants that were planted on the corner of Goewerneur and Rheede streets had to be "topped" on various occasions so as not to obscure the sight distance across the street corner. Some of the endemic plants in Sluysken Park similarly grew into sizeable shrubs which is arguably not the most appropriate for the area in which it was used (see also par. 24.4 in attached document). In order not to overgrow the area these plants would similarly require pruning to keep the relevant portions of the park functional. From this point of view these plants are not as maintenance free as contended by the objectors. The fact remains that it is a public park and it would require maintenance irrespective of the plant type used. No expert evidence is required to assert that these plants require maintenance and that this present an additional difficulty. The soil conditions have not presented any problems to these plants. These plants established well and they now require maintenance. The removal of alien vegetation would be required irrespective of the plant type used (endemic or indigenous). Whether the maintenance of the endemic plants will be less expensive only time will tell. The contention that these plants cost 10 times less per square metre to establish is contestable. The objectors contend that the change in the business plan will expose the WCID to higher cost what the planting strategy is concerned. The objector cites a report prepared by [REDACTED] (Annexure A). The relevant part of the report, as it relates to the cost, are located on pages 18 and 19. There, under section 8.4 a table is provided that gives a breakdown of the various cost elements. From this table it can be seen that the endemic planting is highly dependent on volunteer input to keep the cost low. It is further stated that no compost or other organic matter is needed apart from straw. In contrast the indigenous plants costs are higher because it is commercially prepared and labour costs are applicable. It further requires compost, fertiliser, water and further labour. The volunteer effort, although commendable, and fostering a sense of ownership, is not an input that WCID can rely on or call upon at any time when needed. Hence all efforts on this front will take place at a higher cost if WCID is to use its own labour to undertake the planting and related maintenance. WCID cannot be dependent on volunteers to implement its business plan and to assist with ongoing maintenance. In this regard it is highly contestable whether the said savings will materialise. Consequently less of the endemic planting will be done. The cost differential that the objector claims is not supported by the available information. Apart from the establishment any garden requires continuous maintenance whether the plants are endemic or not (see argument above). There is simply too little information available at present to make any definitive statements as to cost advantages. It is submitted that the cost differential, if there is one, is not close to 10 times. See also par. 6 in attached document.	
23						

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
24			<u>"Governance Alignment"</u> - It is misleading to state. That the approach is necessary. For governance alignment in as much as it seeks to correct the lack of formal improvement that accompanied earlier exclusive or Renosterveld initiatives. That is so for the following reasons: • In term 1: i. every project or service carried out by the WCID as part of the rehabilitation approach was approved by the board; ii. the rehabilitation approach was discussed and canvassed with the community in newsletters, the public participation process in respect of the Sluysken park upgrade (where this approach was supported by more than 80% of the participants) and explained at various AGMs (where the sense of the meetings was one of general support); and iii. in contrast to other WCID portfolios, the Greening portfolio held regular workshops, maintenance/planting events and expert talks which were widely published, open to all, and well attended by a growing group of dedicated volunteers. • In any event, the rehabilitation approach was canvassed as part of the Term 2 public participation process. There is no merit in the statement that the Renosterveld approach was not adequately explained during this public participation process or not supported by the majority of the WCID NPC members, additional ratepayers and WCID residents.	No	The objector's statement that every project or service carried out by the WCID as part of the rehabilitation approach was approved by the board is contestable. The objector is to prove that this is so. The objector, [REDACTED], abruptly resigned on 3 October 2025 after it was required that each director confirms ownership of property in the defined area. Property ownership is a prerequisite for membership and membership is a prerequisite to be elected as a director. The election of a director who does not comply to the requirements of the MOI is a nullity section 66(6) of the Companies Act. This affects many things - meeting quorums, matters of representation, etc. A limited number of people (82) participated in the Sluysken Park survey and hence the statistical significance (considering that there are 1446 properties in the defined area) is questionable. It is doubtful that the support was as high as the objector contends - see paras. 14 and 24.4 in attached document. The support level of 80% in Sluysken Park survey appears to be overstated. The results were: 1) negative to indifferent (ratings 1-6) – 30.5%; Moderate to positive (ratings 7 and 8) – 29.3%; Positive (rating 9 and 10) – 40.2%. Although the rehabilitation process was presented at the 2024 AGM, where the T2 business plan was accepted, no other public participation took place with respect to the T2 business plan to gauge any support or otherwise for the endemic planting. At the said AGM it was not presented in such a way as to make it clear that it is an absolute exclusive approach and that no other plants may be considered. In fact the board was unaware regarding the claims of absolute exclusivity which subsequently surfaced. The restoration of the endemic planting was advanced as a novel approach to restore the natural environment but no indication was given regarding the extent thereof or any particular details pertaining to it. The statements under "Governance Alignment" is correct in that the matter came to a head at the board meeting on 22 April 2025 and was subsequently discussed at a meeting on 4 August 2025 and thereafter presented to the members at the November 2025 AGM as the amended business plan. Nothing under this heading indicates that it comprises a material amendment.	
25			<u>"Ecological integrity"</u> - There is no objective evidence to support the claim that "[generic] indigenous planting remains ecologically responsible, promoting pollinators, water efficiency and is naturally resilience. Including endemic species within broader indigenous frameworks enhances ecological function while ensuring that parks remain vibrant and usable." - With the greatest respect, this is a meaningless statement, which reflects a lack of expertise and understanding of the terminology employed, and amounts to little more than greenwashing - • We reiterate what we have stated above regarding ecological functioning, biodiversity, the resilience of Renosterveld (especially in the context of climate change and lower annual rainfall) and its indirect benefits in relation to public open spaces and formal parks. • Given the irrefutable success of the Renosterveld planting in Sluysken Park (including the anecdotal evidence of parents who recount how their children use the dense stands of Wild Dagga (Leonotis Leonurus) as hide-and-seek spots and observe/ look for insects in the Renosterveld areas), there is no objective basis to claim that Renosterveld are not appropriate for a park scape or render parks dull and unusable. • Similarly, there is no objective evidence that the generic indigenous planting approach will promote pollinators - i. generic indigenous species are unlikely to support local or specialist pollinators; ii. at best, they may support generalist pollinators, but that would depend on plant species selection which is not even considered or dealt with in the amendment documents; iii. the validity of this statement is doubtful, particularly because the amendment does not even recognise that many generic indigenous species available at wholesale "indigenous" nurseries are hybrids, where their ability to support even generalist pollinators may be compromised. • Given the catastrophic loss of biodiversity and the latest climate change modelling and peer-reviewed studies (see particularly the COP30 reports), it is a singularly false claim that the generic indigenous approach is "ecologically responsible". Adopting this approach – and discarding the rewilding/ Renosterveld rehabilitation approach which represents the "gold standard" of planting in public spaces – will result lost conservation and climate change mitigation opportunities at the expense of current and future generations, as well as the City of Cape Town (as custodian of public green spaces).	No	These are subjective statements and do not convey in any meaningful way how the expansion of plant type, to include indigenous plants, whilst retaining focus on endemic planting, constitute a material amendment to the business plan. The objectors fail to see what opportunities still exist to advance urban renewal in the way they wish to see it with its associated benefits. The objectors view of exclusivity was rejected by the majority of the members who voted on the issue at the AGM.	

No	Surname	Name	Comment received on the Business Plan	Does the comment comprise a material amendment? (Yes or No)	If no, provide reasons	If yes, provide detail
26			<u>Insertion: 'Designated Planting Zones'</u> — A: Indigenous-Dominant Areas (site list); B: Endemic-Dominant (Renosterveld) Areas Developed by WCID (site list); C: Naturally Occurring Endemic Zones (site list). (pp. 17–18) - The zone designation amounts to a 80-90% reduction in the size of areas available for Renosterveld rehabilitation (i.e. stepping stone habitats and ecological corridors). - The designation of planting zones was conducted without any expert input or prior community input. - No objective scientific basis has been presented for the designation of the zones. The unavoidable inference is that site selection was based mainly on aesthetic considerations and biased views in respect of Renosterveld. - The entirely subjective basis of these designations constitutes a significant departure from approach under the approved Term 2 business plan, where site selection is based on: • Best practice rehabilitation guidelines; • Criteria established by the Fynbos Corridor Collaboration (using their site selection/ analysis tool) (including but not limited to connectivity, possibilities for expansion etc.).	No	The statements regarding the size of the designated areas available for endemic planting is factually incorrect (see par. 22 in attached document). Consequently the inferences are wrong. The designated areas in fact present an ideal opportunity to progress this aspect and demonstrate what value it can bring. The objector(s) fails to see what opportunities there are. The objector is incorrect to contend that the T2 business plan indicate the site selection and that the amendment constitute a significant departure therefrom. The T2-business plan in no way indicates what will happen where. The designation of the areas as provided in the amended business plan required no scientific input. The designation of areas where the different types of planting is to take place is not a material amendment to the business plan.	
			<u>Insertion: Key actions</u> Planting & rehabilitation; Community engagement; monitoring and maintenance; partnerships and research; urban upliftment; “regreening strategy” (p. 19 - 20) urban upliftment (page 20) summation (page 20) - The claims made in this section in respect of “rehabilitation”, “replanting programmes to restore ‘native’ vegetation”, the prioritisation of degraded areas, the creation of biodiversity gardens across the suburb, community engagement, sustainability, supporting citizen science, tracking pollinators, and collaborating with various partners are not supported by any objective evidence, is contradicted by other statements and necessary inferences elsewhere in the amended text and amount to little more than greenwashing. - The elements of these claims have already been dealt above and will not be repeated here. However, the following aspects bear specific mention: • These claims are highly questionable given the key spatial considerations applicable in urban rewilding projects. Rehabilitation areas (or stepping stones) must be of an adequate size and in sufficient proximity of each other to have any meaningful or material impact (studies generally recommend linear, connected areas or, if not linear & connected, then no more than 100 – 200 metres apart. • The unserious manner in which these claims have been made stand in stark contrast to the rigorous scientific approach which lies at the heart of the Council-approved business plan and the gravity of the challenges we face as a result of existential biodiversity loss and climate change.	No	These statements are subjective opinions and do not assist to determine whether the amend of the business plan is material or not. These statements are consequently irrelevant. It is necessary to point out that the statement regarding the size and proximity of the area designated for endemic planting is factually incorrect and hence incorrect inferences are made (see line 34 and par. 22 in the attached document).	
			• Given the unscientific approach of the WCID in this amendment document and the biased views expressed in respect of Renosterveld, it is highly doubtful that any independent experts, environmental NGOs, and volunteers committed to meaningful urban rehabilitation and conservation will be willing to collaborate with the WCID. Firstly, given the enormous challenges faced by urban conservationists in the City of Cape Town, these stakeholders are highly unlikely to spend their limited resources (funds, labour and precious free time) on projects that have no meaningful environmental impact; Second, these stakeholder are unlikely to partner or collaborate with the WCID where the WCID's values do not align with theirs. • The objectors are already aware of two experts in the field of botany and urban rehabilitation who have expressed reservations about continued involvement with the WCID as a result of the contents of this proposed amendment			

Attachment to Comment Sheet

Response to objection submitted by [REDACTED]

In what follows below is a response to the objections of [REDACTED]. It also incorporates responses from other objectors who are referenced in the submitted documents. Hence it is not an ad seriatim response, but responds to the main contentions noted in the objections. Please note that the singular 'objector' also includes the plural and vice versa.

The City required that the objections are to be summarised in a table form. In this regard two spreadsheets were prepared. The one dealing with responses from the objectors who submitted their objections in time, and the other one providing comments on objections received outside of the period in which objections could be submitted. The two spreadsheets refer to this document and hence the three documents are to be read together.

1. Ad Paragraph 3: Canvassing for proxies

- 1.1. The objector contends that the Board members and WCID NPC manager canvassed members to obtain proxies to achieve a sinister, pre-meditated plan (amend the business plan) and that it is irregular. The objector further contends that the subsequent voting was deliberately undertaken by means of a poll and not by means of a show of hands and that it was deliberately so decided in order to cast votes on behalf of the proxies, which would otherwise not have been possible. The objector contends that when voting is by means of a show of hands the person holding the proxy (or proxies) only has one vote irrespective of the number of proxies he or she holds.
- 1.2. It is submitted that the objectors are wrong in their assessment of the situation. The objectors fail to recognise that in company business, whether for profit or not, comprise both matters of right and matters of interest. In order to advance matters of interest support is to be obtained from the members. This is, for the lack of a better description, the political dimension of the WCID's activities. To go around and solicit support for a position is not untoward. It is open for the directors and any other member of the WCID NPC to do so. It is further not uncommon that members (or shareholders) reach agreement amongst each other in everyday commercial life in terms of what positions they will support or otherwise. Similarly, if a person wants to be elected as a director, or re-elected as a director, he / she is to canvass for support to ensure that they have the best chance at success. Whether that support is obtained by means of a proxy or otherwise is immaterial. There is nothing in the Companies Act or the MOI that prohibits that.
- 1.3. It needs to be noted that the proxy form was prepared such that the member could indicate his / her decisions on the form beforehand as it pertains to the various matters on the agenda. Alternatively, the member could have appointed the proxy holder to act on his behalf as he/she sees fit. The fact

that the Board members obtained proxies and the objectors perhaps not, does not militate against the validity thereof. There is no limit on the number of proxies a person may accept from members prepared to give proxies.

- 1.4. Further, it needs to be pointed out that the objectors were free to canvass any property owner in the defined area, who is not yet a member of the WCID, to become a member and support their agenda.
- 1.5. The contention that voting by show of hands would restrict the proxy holders to one vote is misdirected. If it was indeed so, it would have restricted the right of the member, who provided a proxy, to have his/her right exercised. This would be a violation of the member's right under subsection 58(1) of the Act. Subsection 63(5) of the Act restricts a shareholder's voting right to one vote, irrespective of the number of votes that are associated with the securities which that shareholder holds, when voting is by a show of hands. Subsection 63(6) of the Act allows the shareholders to exercise the full complement of their rights when voting takes place by means of a poll. Since WCID NPC cannot issue securities, these provisions do not apply. The voting rights of the members are provided for under item 15.11 of the MOI and is in relation to the value of the member's property. The members are entitled to exercise the number of votes so assigned to them. There is nothing in the MOI that indicates that a member's number of votes is restricted to one vote in the case that voting is undertaken by a show of hands. This applies to a member when he exercises his right to vote, and this also applies when the same member exercises the rights in terms of the proxies he/she holds. Therefore, if a member has one vote in relation to his membership and he holds two votes in terms of a proxy (or two proxies), he / she would exercise three votes when he / she raises his / her hand when voting takes place on a resolution. The situation can arise where the same person must raise his hand both in favour and against a resolution if the proxy or proxies he / she holds determine such. It is therefore necessary to provide members with a card which indicates the number of votes they are entitled to exercise. This is to happen at the registration before the meeting starts so that the counting can be done accurately. This was done at previous meetings.

2. Ad Paragraph 4: Proxies

- 2.1. The objectors complain that some individuals, who held proxies, but did not deliver it to the company earlier than 24 hours before the meeting, were incorrectly restricted from exercising the associated right. The objectors contends that such restriction was invalid and in contravention of the companies Act. In support of the contention, a legal authority from the SA Law Reports is provided.

- 2.2. It is acknowledged that the SCA's decision in the case *Richard du Plessis Barry v Clearwater Estates NPC* 2017(3) 364 (SCA) provides authority that the provision of a condition in a company's MOI, that provides that proxies must be delivered to a company by a given time, restricts a shareholder's right to appoint a proxy at any time (section 58(1) and 58(3)(c) of the Act). The court however acknowledged the practical importance of having such a provision in a company's MOI as it needs to prepare for a meeting and therefore need to know who will exercise what voting rights etc. The court noted that although it is alive to the need for such a provision it is not necessary to strain the interpretation of the Act to achieve it, it is a matter for the legislature to address. To date, the legislature has not amended the Act to cure this shortcoming. The court dismissed the application to declare the meeting invalid because of non-compliance to the company's MOI. In the said case the meeting resolved to accept the proxies irrespective of the late submission (time limit stated in the MOI) in order to quorate the meeting and conduct its business and vote on resolutions. The application was brought to declare a decision taken at the meeting invalid. It failed.
- 2.3. The WCID NPC acted in accordance with the provisions in its MOI (item 14.5), which require that a proxy must be delivered to the Company at least 24 hours before the meeting, and in so doing certain (eight) proxy instruments were not accepted where they were submitted outside the timeframe stipulated in the MOI. Even if those proxies were taken into account, they would not have affected the outcome of the vote. No prejudice arises that would warrant impugning the validity of the proceedings.

3. Ad Paragraph 5: Voting

- 3.1. The objectors argue that the voting by means of ballot was irregular and therefore invalid. The objectors rely on item 15.11.8 of the MOI and quotes as follows: *"voting shall be decided on a show of hands, unless before or on the declaration of the result of the show of hands, a poll is demanded that voting shall be by a show of hands"* (sic) emphasis added. The provision of item 15.11.8 of the MOI is unfortunately incorrectly quoted (the underlined part was incorrectly added – a bona fide mistake).

- 3.2. Item 15.11.8 provides in relevant part as follows:

"At a meeting of members, voting shall be decided on a show of hands, unless before or on the declaration of the result of the show of hands a poll is demanded by –

15.11.8.1. the chairperson;

15.11.8.2 by at least five persons having the right to vote

15.11.8.3 a person who is, or persons who together are, entitled (as a member or a member's proxy, to exercise at least 10% of the voting rights “

3.3. The objector argues that the above provision requires that voting must firstly be done by show of hands and only after the show of hands as taken place can the chairperson require a poll (voting by means of ballot).

3.4. It is submitted that this interpretation is not correct. It is not correct for the following reasons:

3.4.1. Although the word “shall” indicates it to be obligatory it is important to take note of the qualification “unless”. Therefore, voting by a show of hands may be viewed as obligatory but it is not absolute. There can be instances where voting by means of ballot is required. The qualification “*unless before or on the declaration of the result of the show of hands a poll is demanded by –*” may create the impression that the demand must be made at the time of voting. It is submitted that this is not correct. In this regard it is necessary to look at the provisions in the Companies Act.

3.4.2. Section 63(7) of the Companies Act provides in relevant part as follows:

“Despite any provision of a company’s Memorandum of Incorporation or agreement to the contrary, a polled vote must be held on any particular matter to be voted on at a meeting if a demand for such a vote is made by –

(a) by at least five persons having the right to vote

(b) a person who is, or persons who together are, entitled (as a member or a member’s proxy, to exercise at least 10% of the voting rights “ emphasis added.

3.4.3. Subitems (a) and (b) were incorporated, mutatis mutandis, into the MOI under items 15.11.8.2 and 15.11.8.3. The implication of the abovementioned is that item 15.11.8 cannot limit the right of the said individuals to demand that voting is to be done by means of a poll. Since the MOI extends the same right to the chairperson, the chairperson enjoys the same unrestricted right to demand a poll instead of voting by means of a show of hands.

3.4.4. It is further important to note that there is nothing in subsection 63(7) to indicate as to when the said individuals are to exercise their right to demand that voting is to be done by means of a poll. Since the right is extended to proxy holders, and a proxy is valid for a year, unless determined otherwise by the right holder (subsection 58(2)(b)(ii)), this

right can be exercised at least within the said year whenever notice is received of a meeting where voting is to take place.

- 3.4.5. Viewed in the context of the requirement under the Act the words “*unless before or on the declaration of the result of the show of hands*” can only be interpreted to mean that the demand can be made at any time from the time that notice of the meeting is received. If not, the MOI restricts the said rights which it is not permitted to do. If indeed it does restrict the right, it shall suffer the same fate as was the case with subsections 58(1) and 58(3)(c) in the Clearwater Estate case referred to above. If this were to happen it will not invalidate the polling done at the AGM on 4 November 2025, since voting by means of a ballot is recognised as one of the two methods that can be employed (section 63(4) of the Act). The Act does not prescribe which method to use.
- 3.4.6. Therefore, the demand for a poll can be made before the meeting, at the meeting or even up to the point where the result of the show of hands is declared. This unrestricted nature of the right is in keeping with the requirements under subsection 63(7) of the Act.
- 3.4.7. It is further important to note that the circumstances under which such a demand can be made is not stated. In the absence of any stated circumstances the demand can be made at the sole discretion of the relevant individuals.
- 3.4.8. Neither the MOI nor the Companies Act require that the members be informed, or otherwise approve, by means of adopting a resolution, that voting takes place by means of a poll.
- 3.4.9. The MOI permits voting by way of a poll. The Companies Act and the MOI preserves the right of the chairperson or qualifying members to require that voting be conducted in that manner. The chairperson exercised that right. The voting procedure was accordingly compliant.
- 3.4.10. A member of a company must submit to the provisions in its MOI and the Companies Act.

4. Ad paragraph 6: Amendments to business plan

- 4.1. The objectors argue that the amendments to the business plan should have been specifically highlighted as it is unreasonable to expect a layperson to compare two similar 98-page documents. Although not explicitly stated the objectors aim at the sufficiency and specificity of the matter to be decided on. In this regard subsection 65(4) of the Act requires “*A proposed resolution is not subject to the requirements of*

section 6(4), but must be – (a) expressed with sufficient clarity and specificity; and (b) accompanied by sufficient information or explanatory material, to enable a shareholder who is entitled to vote on the resolution to determine whether to participate in the meeting and to seek to influence the outcome of the vote on the resolution”.

- 4.2. The entire amended business plan was provided to the members which enabled the members to review the entire document. Although a lengthy document, the entire plan comprises 46 pages including the appendices which contain the implementation plan and the proposed budget. The remainder is a list of the properties in the defined area. The document is written in plain language and the average member of the WCID NPC can read it in less than an hour. Once read the member would know what it comprises and would be able to agree with it or not. The original T2 plan is available on the website and can similarly be read in less than an hour. The average member would then be able to see how the plans differ and can then delve deeper into the detail if he / she so wishes.
- 4.3. In addition, there is no prescribed format in which the material related to an amendment of a business plan is to be put to the members.
- 4.4. Other than the objectors, who raised it at the meeting, no one else complained. The majority did not share the objectors' concerns.
- 4.5. It needs to be noted that the Act provides, under section 65(5), that any member or director, who believes that the proposed resolution does not comply to section 65(4), may seek leave to apply to a court for an order restraining the company to put the resolution to a vote until it complies with section 65(4). No one sought such relief.
- 4.6. Section 65(6) provides *“Once a resolution has been approved, it may not be challenged or impugned by any person in any forum on the grounds that it did not satisfy subsection 4”*
- 4.7. Section 65(6) precludes a challenge to the resolution based on alleged non-compliance with the requirements relating to the provision of information accompanying the proposed resolution, and the resolution was adopted at a properly constituted meeting.
- 4.8. The essence of the matter is that the WCID NPC put the matter regarding the amendment of the business plan to its members who resolved, by majority vote (116 in favour, 14 against and 3 abstained), at a properly constituted meeting, to submit an application to the City to formally amend the business plan.

5. Ad paragraph 7: Revised AGM documentation

- 5.1. The objector complains that documents were amended after they were made available to the members as part of the notice of the AGM. The objectors complain that this is highly irregular. Whether this is so will depend on the facts of the matter and whether material changes were made. It is submitted that the changes that were made were only minor word changes to effect editorial corrections. It did not affect the meaning of the document. Other than the objectors no one else complained of the same.

6. Ad paragraph 8: Cost implications of the change of the business plan

- 6.1. The objectors contend that the change in the business plan will expose the WCID NPC to higher cost what the planting strategy is concerned. The objector cites a report prepared by [REDACTED]. The report was annexed to the objection. The relevant part of the report, as it relates to the cost, are located on pages 18 and 19. There, under section 8.4 a table is provided that gives a breakdown of the various cost elements. From this table it can be seen that the endemic planting is highly dependent on volunteer input to keep the cost low. It is further stated that no compost or other organic matter is needed apart from straw. In contrast the indigenous plants costs are higher because it is commercially prepared and labour costs are applicable. It further requires compost, fertiliser, water and further labour.
- 6.2. It is submitted that the volunteer effort, although commendable, is not an input that WCID NPC can rely on or call upon at any time when needed. Hence all efforts on this front will take place at a higher cost if WCID NPC is to use its own labour to undertake the planting and related maintenance. WCID NPC cannot be dependent on volunteers to implement its business plan and to assist with ongoing maintenance. In this regard it highly unlikely that the said savings will materialise.
- 6.3. The Jip de Jager / Pandoer embankment project is noted in the report as having produced a financial surplus. This is in fact not the case. A significant amount of bark was (is) used (as is also the case in Sluysken Park), and the labour was mostly not volunteer labour. The plants were also watered (as would any initial planting be irrespective of being endemic (locally indigenous) or indigenous to South Africa). This project in fact came at an expense to WCID. It ultimately did not render any surplus.
- 6.4. On the information available, the asserted cost differential is not supported. The comparison appears to rely materially on volunteer input, which is not an operational input that the WCID can assume. Apart from the establishment any garden requires continuous maintenance whether the

plants are endemic or not. There is simply too little information available at present to make any definitive statements as to cost advantages. It is submitted that the cost differential, if there is one, is not close to 10 times, it is much less. It would be irresponsible to communicate such information if it is not true.

6.5. It needs to be noted that the input of [REDACTED], who is a local indigenous and endemic consultant and an expert in his field, earned upwards of R364,302.00 during T1 and this cost is not considered in the cost analysis referred to in paragraph 6.1 above. Similarly, the cost of Nature Connect (currently a R24,747.00 (incl. VAT) monthly expense) detracts from the cost advantage argued for.

6.6. If the volunteer effort is removed/withdrawn less of this type of work will be done. The budget is not affected by the amendment of the business plan.

7. Ad paragraph 9

7.1. The content of this paragraph is unfounded.

8. Ad paragraph 10: Impact of outsourcing

8.1. The matter of outsourcing has not been decided. Whether it will happen or not is a decision the Board is empowered to make. The implementation plan (Part B of the amended business plan (p33 – p44) contemplates the appointment of such service providers. The amendment of the business plan does not affect this aspect.

9. Ad paragraph 11: Design of Goewerneur Park

9.1. To present a draft plan to members as a proposal of what is envisaged for the park upgrade is not untoward. There is no prescribed way in which to solicit the input of the community on a particular issue or how the design process is to be undertaken. By way of comparison: In most cases where environmental authorisations are required under NEMA, for infrastructure improvements, a basic plan of what is intended to be constructed precedes the public participation. This is required to identify what impacts there may be. The public is then engaged on this proposal an input is solicited. The designs are then refined to mitigate the impacts or otherwise take constructive input into consideration. What the development of Goewerneur Park is concerned the approach is no different. It is submitted that a draft plan of what is intended would facilitate more constructive engagement and obtain better input from the community.

9.2. To claim that it comprises abortive cost is unfounded.

10. Response to objections received from [REDACTED]

- 10.1. The essence of the objections received from [REDACTED] in large part overlap with the objections raised by [REDACTED].
11. **Ad paragraph 2 and 3:** It largely contains idealistic and ambitious claims that the restoration / rehabilitation of ecosystems (including the biodiversity element) will contribute to the combat of climate change. If this is (will be) so in this instance and in the context of the WCID NPC is almost impossible to establish. It will remain a matter of speculation. Most of the plants in the defined area are situated in privately owned gardens, and a good compliment of these plants are indigenous and exogenous plants. It is therefore doubtful if planting in available public open spaces and road reserves, which areas are collectively considerably smaller than the privately owned land, will make any impact on the objectives stated. Having said that it does not detract from the fact that conservation and rehabilitation are commendable activities.
12. **Ad paragraph 3:** It is noted that the volunteers started a process to collect plant materials and propagate species belonging to the endemic plants in this area and planted the same in three areas (Goewerneur Park (approximately 258m²), Sluysken Park (approximately 879m²) and Welcome Garden (approximately 346m²).
13. **Ad paragraph 4:** The proponents of the amendment of the business plan were upfront about matters of aesthetics, functionality etc. Aesthetics and functionality are mentioned in the amended business plan. It was also raised at the meeting on 4 August 2025. Nothing in this regard was concealed from the members. The visual aspect of the endemic plants is the origin of the discord which culminated in the proposed amendment of the business plan. It would have been helpful if the objector listed the incidences where misleading or deceptive publicity was distributed by the WCID.
14. **Ad paragraph 5:** The contention regarding cost is contestable, see above (paragraph 6). To claim that members were misled in this regard is a baseless allegation. The allegation that the fiduciary duties were violated is equally contestable. The question arises whether the objector knows to whom what fiduciary duties are owed? The T1 business plan contained no significant activities under the greening portfolio (or EMD as it is now called). That what was developed and achieved during T1 under this heading found its way into the activities of WCID NPC under the premise of being an immaterial amendment. It is to be noted that the T1 business plan was never formally amended during T1. No meaningful public participation was done during T1 to assess the residents buy-in regarding endemic planting. If, however, the

objector wishes to contend that the survey¹ in respect of the Sluysken Park development and the related meeting at the Tygerberg Nature Reserve's Christo Pienaar centre comprise such participation, it is submitted that it is incorrect. The aforementioned was done in the context of the Sluysken Park development and not the plant / biodiversity rehabilitation in the context of the entire defined area. Apart from the aforementioned the sample size was small (82 responses, with some households submitting more than one response) and hence its statistical significance can be questioned in light of the 1446 properties in the defined area. Similarly, approximately 50 people attend the abovementioned meeting. The T2 business plan made provision for the plant rehabilitation strategy but it certainly did not convey the intention that henceforth only endemic plants will be planted by the WCID's defined area. Although there was significant emphasis on the rehabilitation of the locally indigenous plants in the T2 business plan, it was never understood to be entirely exclusive. It certainly also did not create the impression that the WCID NPC will become a conservation agency and the entire defined area a conservancy. At no stage was a board resolution adopted, or one proposed to the members, which explicitly conveyed the message that henceforth the planting shall be absolutely exclusive – only endemic SSR. That was never so, and when the question was asked the answer had to be no. It was from this point where the need arose to make it clear that the planting was not exclusive. The notion of a planting policy (original or new) is the construction of the few involved in the greening activities (this interest group). Since there was never any board resolution in this regard and the T1 plan was never formally amended, no such policy could have come into existence, and for that matter could not have been superseded. It needs to be noted that whatever plants are planted in the public space is subject to the City's approval. It is necessary to note that the amendment to the T2 business plan does not do away with the objective of rehabilitating the endemic plants or local indigenous plants, it merely confines it to specific areas. There is still

¹ Two questions were asked viz D.1 and D2 -

"D.1 Endemic meadow design - planting will focus on low-growing shrubs, ground covers, flowering bulbs and annuals so that any planted areas form part of the activity zones. Taller plants will only be planted along the perimeter to soften boundary walls, using shrubs with thorns to address safety & security concerns. All plants are propagated from local genetic stock by WCID NPC volunteers and our rehabilitation expert, which results in significant costs savings. Here are just a view of the species which we are currently propagating (2 of the species on the photograph below are listed as near threatened on SANBI's red data list)". The response to this question was: 1) negative to indifferent (ratings 1-6) – 30.5%; Moderate to positive (ratings 7 and 8) – 29.3%; Positive (rating 9 and 10) – 40.2%.

"D.2 - Pollinator garden - in keeping with the "imagination takes flight" concept, the design could include a pollinator garden featuring the wide variety of Renosterveld flowers with pathways, interactive signage and seating areas. The garden would provide an ideal setting for environmental education events for local children, hosted by WCID NPC and guest speakers (e.g. botanists & entomologists)". The response to this question was: 1) negative to indifferent (ratings 1-6) – 39.0%; Moderate to positive (ratings 7 and 8) – 24.4%; Positive (rating 9 and 10) – 36.6%.

ample opportunity for developments in this regard. The aim is to achieve a balanced approach that would include the various interest groups (those that like Renosterveld plants and those who don't). Since the provisions of the T2 business plan under the EMD heading found its way in there as immaterial changes to the T1 business plan, and no meaningful public participation was done to gauge public support, a further amendment in this respect remains an immaterial amendment.

15. **Ad paragraph 6:** The statement that the volunteers care more about the harm caused to the urban conservation than to themselves is an emotive statement. However, if that was indeed so, none of these contentious issues would have arisen. The fact that some people expressed a negative opinion regarding the aesthetics, and wish to see other plants being used, indicate that the endemic planting did not render the results hoped for, at least not at that stage. Since the plant rehabilitation process was still in progress and nobody knew (and still don't know) what to expect it would have been politically wise to allow others to beautify some parts of the public space with other plants (indigenous) whilst more species become available as a part of the ongoing rehabilitation effort. In this way the rehabilitation work could continue in other parts of the defined area and the naysayer residents could eventually warm to it if the results are pleasing. This appears to be impossible now, since the first mention of any plants other than endemic or locally indigenous plants precipitated this current contestation. If the objectors really cared for the biodiversity and the associated upgrade/rehabilitation they would have found a way to make it work and make compromises on the way to achieve it. A hardened attitude is not conducive. In a residential area like this people's views regarding aesthetic will play a role irrespective of the objector's view that aesthetics is subjective to and need to yield to science. These individuals pay the additional rate and the majority view is reflected in the vote count at the AGM where the resolution was adopted – see par. 4 above (specifically par. 4.6). To emphasize: It was the members of the WCID NPC that approved the T2 business plan which now resolved that the amendment be applied for.
16. **Ad paragraph 7:** The matter pertaining to notice etc. is dealt with in paragraph 4 above and as discussed there the decision was validly made.
17. **Ad paragraph 8:** It is contended that the notice was defective. This not the case - see paragraphs 4 and 16.
18. **Ad paragraph 9:** Ditto
19. **Ad paragraph 10 to 12:** There was no need to include the council approved T2 business plan. The members could have found it on the WCID NPC website if they wished to see it. Alternatively, they could have asked for it. As it turned out nobody other than the objectors complained about this issue. There was no

need or prescription that required an explanatory note to accompany the revised document. See response on this matter above under paragraph 4 and 16.

20. **Ad paragraph 13:** See discussion under paragraph 14 above. It is contended that it is not a material amendment for the reasons provided above under paragraph 14.
21. **Ad paragraph 14:** For the reasons explained above the provisions under the EMD heading in the T2 business plan found its way in there on being considered immaterial amendments. For the same reason it can be amended as being immaterial. No meaningful public participation was undertaken when the T2 business plan was compiled. This contrary to the claim that there was public participation (p17 of the objection document). It would have been helpful if the objector indicated how and when the public participation was done as is claimed. The T2 business plan was essentially a continuation of the T1 business plan. The T1 business plan was never formally amended.
22. **Ad paragraph 15:** The claim regarding the reduction in the size of the area that is now available for the endemic planting (80 to 90% reduced) is exaggerated.
 - 22.1. The table below shows the approximate sizes of the various areas noted in the amended business plan (measured in Google Earth – approximately 3% error).

Area (name)	Predominant indigenous (size in m ²)	Endemic dominant (SSR) (size m ²)
Sluysken Park	1,867	879*
Goewerneur	3,368	0
Welcome Garden	346	No
Lincoln Park	0	10,735
Patriot Park	5,485	0
Vd Merwe singel	467	0
Imhoff	5,879	0
Chavonne	1,399	0
Plettenberg Is.	75	0
JDJ / Pandoer	0	1,776
Bell Rosen / Crown Glory	0	804
Kommandeur (bend)	0	1,056
Kommissaris / BGC	0	9,081
Total	18,886	24,331

Note* - SSR already planted

The total area (designated and non-designated areas) is 43,217m² and 56% of the said area is available for the endemic planting. This is more than

what is designated for predominantly indigenous plants. It is therefore evident that the reduction in area is not as significant as claimed. It is perhaps necessary to note that during the course of the last five years only 1,483m² of endemic SSR were planted (see par. 12). It can therefore be argued that there is sufficient space available where further progress can be made with the endemic planting. Many “stepping stone” gardens can be established designated areas.

- 22.2. It would have been helpful if the key components of the core EMD service which is claimed to have been removed could have been explicitly listed in one place.
- 23. **Ad paragraph 16:** The allegation of false claims being made etc. is a recurring theme.
- 24. The comparison table is noted but it fails to be persuasive regarding the materiality. In this regard the following selected responses:
 - 24.1. The claim that the amendment of the business plan will reduce the available area for endemic plant rehabilitation by 80-90% is discussed above. The further contention that the corridor function of the stepping stone gardens has been discarded is similarly not correct. If the objectors were prepared to look at the available areas they will notice that a corridor can be established along Kommandeur Street leading to Kommissaris Street and from there along the border between Kommissaris Street and the golf club up to Imhoff Park. With a little extra effort along Jip de Jager up to Door-de-Kraal Park (dam area) a corridor can be established between the newly established stepping stone garden in the Door-de-Kraal Park and the doorstep of the Tygerberg Nature Reserve. If that can be achieved, a passage through Imhoff Park at that stage would be uncontentious. Such a corridor would certainly serve the ecological / biodiversity function as advocated for.
 - 24.2. The clearing of invasive alien species can still continue. It falls under maintenance and is being done.
 - 24.3. Too much is being made of the associated impacts and benefits (e.g. mental wellbeing, connectedness sense of community etc.) and that these can only be achieved if endemic plants are used in the public open space as per the strategy the objectors advocate for. To contend that the benefits will not materialise if a wider plant selection is used appears unrealistic irrespective of what may be found in scientific literature. Many a claim has been made in scientific literature which is of academic value only.

- 24.4. Some of these plants are in fact sizeable plants and as such not always suitable in all settings. The plants that were planted on the corner of Goewerneur Street and Rheede Street became quite big and had to be topped on a few occasions since it obstructed the sight distance at the intersection apart from having an untidy appearance. The plants also grow up to the road edge (kerb). Large bushy plants could comprise public safety as it could form hiding places and hence detract from the WCID NPC's main objective which is public safety. Therefore, the use of these plants will be trial and error as not all the species would be suitable in all settings. This aspect appears not be appreciated by the objectors. It is perhaps necessary to look at the question that was posed in the Sluysken Park questionnaire “*Endemic meadow design - planting will focus on low-growing shrubs, ground covers, flowering bulbs and annuals so that any planted areas form part of the activity zones. Taller plants will only be planted along the perimeter to soften boundary walls, using shrubs with thorns to address safety & security concerns.*”. The planting in Sluysken Park did not follow the aforementioned and consequently large plants (shrubs) are pervasive in Sluysken Park. One can only speculate whether the outcome of the survey would be the same if undertaken now - i.e. 1) negative to indifferent (ratings 1-6) – 30.5%; Moderate to positive (ratings 7 and 8) – 29.3%; Positive (rating 9 and 10) – 40.2%.
- 24.5. It is evident from the objector's comments: “*Undefined “management” cannot improve the ecological functioning and biodiversity of an area if, the plants - (i) are not indigenous to the WCID NPC area and/or adapted to the local soil and climate; (ii) do not support local pollinators; (iii) do not improve the micro-biome; and (iv) improve the ecological functioning of the area.*” emphasis added. Therefore, by implication the objector contends that the T2 business plan, what EMD is concerned, cannot entertain anything other than the rehabilitation and reintroduction of the endemic (locally indigenous) plants in the area. In their view the additional service that is offered is this restoration and conservation of the endemic plants in the area and nothing else may happen; and if there is a change then it is a material deviation. An objective read of the T2 plan yields no such meaning.
- 24.6. The aspect related to the chipper / mulcher was inadvertently removed when the image was deleted from the document, but it is still referenced on p19. The associated budget for this planned activity is still available.
- 24.7. The objector's case is in some respects contradictory. The objector argues that the endemic planting will be more cost effective than indigenous plants and indicate that it is so because it is largely based on volunteer effort. If this is the case, then why draw WCID NPC into the fray? The volunteers can continue to do what they are doing, they don't need WCID NPC

approval. Of course, they would need the City's approval but that they can get without WCID NPC involvement. On the other hand, the WCID NPC cannot make commitments based on volunteer input that it cannot control. Therefore, if the volunteer effort is removed from the equation, then the cost needs to go up and this increased cost is not catered for. In fact, it is not very determinable. The reality of the matter is that the volunteers (this particular interest group) need funding from WCID NPC and hence it needs to be a symbiotic relationship, which it is not. The interest group wants to dictate what is to happen and WCID NPC must just comply. This is not a workable situation.

25. **Ad paragraph 17:** The accusation that the chairperson acted in a biased manner and did not allow opportunity for meaningful debate is a baseless accusation. The accusation that the amended T2 business plan contains misleading and inaccurate statements is borne from the objector's contention that all benefits etc. originate solely from the rehabilitation and exclusive use of the endemic (locally indigenous) plants. Whether this is so is by no means clear. What metric would one use to determine whether it is achieved? The objector does not provide a suggestion.
26. **Ad paragraph 18:** Already dealt with above.
27. **Ad paragraph 19 and 20:** The heckling etc. is par for the course where matters of interest are at stake. The fact that the heckling occurred is indicative that there was no widespread support for the points the objectors wished to raise. The heckling was in any event not as overwhelming as the objector wish to indicate. The fact that the poll afterwards indicated that the resolution was approved by a large majority supports the fact that the members were not interested in any meaningful debate. They considered the material and made up their minds. The incident regarding the member that misbehaved is exaggerated. There was no chilling effect.
28. **Ad paragraph 21:** It is a subjective opinion by the objector. The public interest is reflected by the majority's choice at the meeting. If the objector contends to know better than most of the members at the meeting the question can be asked: Who is trying to be dictatorial now? The objectors make exaggerated claims and hence their opinion can be questioned.
29. **Ad paragraph 22 to 23:** This matter is dealt with above under paragraph 2.
30. **Ad paragraph 24:** In the said case the court did not declare the AGM of Clearwater Estates invalid. It dismissed the application. The application was brought by Mr Barry who asked the court to declare the meeting invalid for condoning the non-compliance with the provision in the MOI. The said provision required that a proxy instrument is to be delivered 48 hours before the meeting.

- 31. **Ad paragraph 25 to 26:** dealt with above (paragraph 2 and paragraph 30).
- 32. **Ad paragraph 27:** This accusation is responded to above. There is nothing untoward or unlawful to canvass support and obtain proxies from members who are prepared to give it, see paragraph 1 above.
- 33. **Ad paragraph 28 :** The same response as provided to paragraph 27 applies here.

34. Concluding remarks

- 34.1. The objections originate from a small group of people who hold particularly strong views regarding the rehabilitation of endemic (locally indigenous) plants and the conservation of biodiversity in the area. There are some meritorious and commendable aspects to it and the Jip de Jager / Pandoer embankment shows the embryo of possible success, but a lot still needs to be done. The work there is not completed. This will come at additional cost and effort which is not known at present.
- 34.2. The amendment of the business plan does not obliterate the strategy to rehabilitate the endemic or local indigenous plants it just confines it to designated areas. These areas are not insignificant, and a lot can still be done in these areas by this interest group (volunteers) and slowly support for the rehabilitation effort can be garnered if the results are pleasing. The Jip de Jager / Pandoer corner is a highly visible area and the ideal place to showcase what can be done. In fact, planting aesthetically appealing knee-high endemic plants (not to compromise safety) on the batter of the newly constructed Jip de Jager carriageway (bordering on the golf course) would add a further 1,114m² to this initiative, and present the same visibility as many people visit the golf course.
- 34.3. Since the T2 business plan did not explicitly or by implication exclude other planting, the amendment to confine the endemic planting to designated areas and allow other indigenous planting explicitly does not constitute a material amendment. It effectively clarifies matters in order to balance the various demands.
- 34.4. The amendment does not alter the WCID's approved budget, does not affect the additional rate, does not expand or reduce the geographical area, and does not change the core service mandate. It regulates the manner in which an existing service, environmental management, is implemented. It retains endemic rehabilitation within designated areas while permitting a broader indigenous planting approach elsewhere. Properly characterised, this does not constitute a change to the scope or level of services as contemplated in the applicable by-law.

OBJECTIONS RECEIVED FROM ADDITIONAL RATE PAYERS FOLLOWING AGM APPROVAL ON 4 NOVEMBER 2025

No	Surname	Name	Objection	WCID Board Response	Objector is an Additional Rate Payer (ARP)	Additional Rate Payer Validation
1			VALIDITY OF WCID 2025 AGM (9 pages with addendum report April 2025):	1. Validity of WCID AGM 2025 See paras 1 to 4 in the attached document. The arguments presented there, in response to the objections received, shows that the meeting was not invalid in any way. Whether a court would declare a meeting invalid because eight people's proxies were rejected because they were late is unlikely. Even if the said eight proxies were accepted and voted against the resolution to amend the business plan it would have made no difference. The resolution was accepted with an overwhelming majority (116 in favour, 14 against and 3 abstained).	1	Property in the name of Confirmed: Objector is nominated to represent the Additional Rate Payer.
			- Selective communication and canvassing of proxies	- Selective Communication & canvassing for proxies This objection is unfounded. All communications were shared on all the WCID platforms with repeated invitations to attend the AGM & providing links to access the information on the website. Invitations to attend the AGM were shared repeatedly on the 5 WCID sector groups. Attendance for the AGM was promoted with enquires to members to attend and if not, requesting them to consider appointing a proxy. The AGM was advertised in Die Burger and The Cape Times on 10 October 2025, more than 15 business days before the AGM, as required in terms of section 62(1)(a) of the Companies Act and item 15.5.1.1. of the MOI. In addition, 15 business days before the AGM, an email notice was sent to all individuals registered on the WCID mailing list, and the website was updated with all relevant AGM documentation to ensure broad access. This documentation included the proposed amendments to the T2 Business Plan. See also paras. 1 and 2 in attached document.		
			- Proxies	- Proxies The objection is unfounded. See paras. 1 and 2 in attached document.		
			- Voting	- Voting by show of hand vs. ballot papers. This objection is unfounded. See par. 3 in the attached document. Voting by ballot is permissible and was correctly undertake. It complied with the provisions in the MOI and the Companies Act.		

No	Surname	Name	Objection	WCID Board Response	Objector is an Additional Rate Payer (ARP)	Additional Rate Payer Validation
			`- No indication of the amendments to the Term 2 Business Plan which was approved at the November 2024 AGM</p> <p>`- Revised AGM Documentation	- T2 Amendments - as per presentation at AGM: See par. 4 in attached document. All requirements regarding notice, documentation and specificity were met and the members voted on the resolution. The resolution passed with a large majority. Once a resolution is adopted it cannot be challenged based on matters related to defective notice etc. - Section 65(6) of the Companies Act. This objection is unfounded. `- Revised AGM Documentation See par. 5 in attached document. Only minor editorial changes were effected. Other than the objectors nobody complained. Since the resolution was adopted matters pertaining to documentation etc. cannot be impugned - section 65(6) of the Companies Act.		
			- No cost implications presented of that change to the November 2024 approved Business Plan	`- No costs implications presented to the change in T2 plans See par. 6 in the attached document. The cost advantage claim is disputed. The perceived advantage is due to volunteer effort and hence does not provide an equal basis to evaluate the cost. For the WCID to rely on volunteer effort, that can easily be withdrawn, is not a workable proposition.		
			`- No evaluation the impact that the changes to the business plan and outsourcing objectives will have on the social upliftment objectives and strategy of the WCID	`- Outsourcing plans - impact on social upliftment objectives & strategies See par 8. in attached document. No decision had been made regarding outsourcing. The implementation plan provides therefore and the board is empowered to make this decision. This objection is unfounded.		
			`- Design of Goewerneur park before a community survey was done	`- Goewerneur park design See par.9 in attached document. There is nothing untoward to submit a draft (concept) plan prior to soliciting input from the residents. This is often done. There is no abortive cost. This objection is unfounded.		
			Procedural non-compliance AND Lack of information on which to vote	2. Lack of information This matter is dealt with above (row 4 and row 7). Sufficient information was available with sufficient specificity. This objection is unfounded.		
2			VALIDITY OF WCID 2025 AGM: 1. Procedural non-compliance	VALIDITY OF THE AGM 1. Procedural non-compliance The objection is similar to the one submit by [REDACTED]. The same response applies here. The meeting was valid. An the resolution complained about validly taken. See par. 3 in attached document. This objection is unfounded.	1	Property registered in the name of [REDACTED] Confirmed: Additional Rate Payer
			2. Selective communication and canvassing of proxies	2. Selective Communication & canvassing for proxies This objection is similar to the one above ([REDACTED]). The same response applies here. The proxies were validly obtained. See par. 1 in attached document. This objection is unfounded.		
			3. Proxies	3. Proxies This objection is similar to the one above. The same response applies here. The proxies were validly obtained. The proxies that were submitted late were not accepted but would not have made a difference. See par. 2 in attached document.		

No	Surname	Name	Objection	WCID Board Response	Objector is an Additional Rate Payer (ARP)	Additional Rate Payer Validation
			4. Voting Procedure	4. Voting Procedure See par. 3 in attached document.		
			5. Lack of Information on the Amended 2nd Term Business Plan	5. Lack of information on the T2 amended Business Plan This objection is similar to the one above. The same response applies here. Sufficient information with sufficient specificity was made available. The resolution was adopted and cannot be impugned - section 65(6) of the Companies Act. See par. 4 in attached document. This objection is unfounded.		
			6. Procedural Irregularities Regarding Documentation	6. Procedural irregularities regarding documentation See par. 5.1 in attached document. This objection is unfounded.		
			7. Impact on Social Upliftment and Staff	7. Impact on social upliftment and staff The amendment did not address any change in process or operational staff requirement. The objection is unfounded.		
			8. Community Engagement	8. Community Engagement A public meeting was held with residents & members. The community was invited to discuss the planting and other matters on 4 August 2025. The amendment allowed for a more inclusive planting approach, allowing for endemic, local indigenous and indigenous plants of South Africa in specified Public Open Spaces. The matter was ultimately put to the members to decide on. This objection is unfounded.		
			9. Summary of Objection	9. Summary of Objection		
			Selective communication and canvassing for proxies were conducted in advance to achieve a pre-determined agenda.	See par. 1 and par. 2 in attached document. This objection is unfounded.		
			Proxy rules were improperly applied, violating the Companies Act.	See par. 1 and par. 2 in attached document.		
			Voting procedure bypassed the default show-of-hands process without justification or resolution.	See par. 3 in attached document. The voting was correctly undertaken and is valid. The objection is unfounded.		
			Members were not provided adequate information regarding the Amended Term 2 Business Plan, including cost, service delivery, Outsourcing, and social upliftment impacts.	See par. 4 in attached document. The objection is unfounded. Sufficient information with sufficient specificity was available. The resolution was adopted and cannot be impugned because of matters related to sufficiency and specificity of information made available prior to the meeting - section 65(6) of the Companies Act.		
			Revised AGM documentation was uploaded irregularly, creating further confusion.	See par. 5 in attached document. The objection is unfounded.		
			Community consultation on key projects, such as Goewerneur Park, was absent.	See par. 9 in attached document. The objection is unfounded.		

No	Surname	Name	Objection	WCID Board Response	Objector is an Additional Rate Payer (ARP)	Additional Rate Payer Validation
3			Objection to the amended business plan Terminology used in the amendment is incorrect and thus makes its implementation practically impossible Rationale given for the amendment is erroneous and misleading	Terminology used is incorrect Endemic plants form part of local indigenous. Local indigenous form part of Indigenous to South Africa. The business plan refers to areas where the focus will be on either endemic, local indigenous or indigenous to SA. The business plan doesn't claim to be prescriptive to solely or exclusively planting ONLY endemic, or local indigenous or indigenous to SA. The business plan identified areas of focus but not to exclusive planting of any specific group of plants. The objection is not addressing the materiality nor the correctness of the amendment. Rational for the amendment of T2 Business Plan This objection is unfounded. To include that which was not explicitly excluded, to address differing views and options is a proper reason to amend the business plan. As such the amendment is not material.	1	Property registered in the name of Confirmed: Additional Rate Payer
4			Objection against Supported amendment of WCID's Business Plan (25 pages): 1. Defective Notice of Proposed Amendment 2. Proposed Amendment is Material (section 26 of CID By-law) 3. AGM resolution invalid – misstatements and lack of impartiality 4. Amendment is not in the public interest 5. AGM invalid - proxies	1. Defective Notice of amendment This matter is extensively dealt with in the attached document (par. 4) as referred to above. The resolution was validly adopted and in terms of section 65(6) the resolution cannot be impugned based on matters related to notice etc. 2. Proposed Amendment is Material (section 26 of CID By-law) Amendment is not material, it does not change the CID Budget and consequential rates, still achieves the broad goals of the WCID BP, no scope or level of services will change, and no expansion of WCID's geographical area will happen. Thus the amendment to the business plan can be dealt with under Section 25 of the CID By-law. See par. 14 in attached document. This objection is unfounded. 3. AGM resolution invalid – misstatements and lack of impartiality This statement is baseless and unfounded, see par. 25 and 27 of the attached document. In addition the City's official were in attendance and can judge for themselves regarding this allegation. 4. Amendment is not in the public interest The amendment does not prohibit endemic rehabilitation initiatives, but merely confine it to designated areas in which endemic (locally indigenous) plants will be focussed on while also allowing for indigenous planting. The greater public interest is thus covered. The overwhelming acceptance of the amended business plan at the AGM clearly shows that the public interest was served. See also par. 28 in attached document. A minority cannot dictate to a majority what is in the public's interest. 5. AGM invalid - proxies This matter is dealt with above and in attached document (par. 1 and par. 2). The proxies that were received late was rejected but would not have made a difference.	1	Property registered in the name of Confirmed: Additional Rate Payer
The following Submission was drafted by 1 person and signed by multiple people						
5			1. No proper notice of the proposed amendment was given to interested and affected parties ("IA&Ps"), in as much as the notice failed clearly to identify the specific amendments and was not accompanied by any proper motivation;	1. No Proper Notice of amendment This objection is dealt with above. The notice was not defective and the resolution validly taken. The matter pertaining to notice cannot be impugned - section 65(6) of the Companies Act. See also par. 4 in attached document.	0	Property in the name of Confirmed representative of the Additional Rate Payer. Already objected, refer Objection 1

No	Surname	Name	Objection	WCID Board Response	Objector is an Additional Rate Payer (ARP)	Additional Rate Payer Validation
6			2. AGM resolution invalid – misstatements and lack of impartiality Over and above the aforesaid defects, the resolution to adopt the proposed amendment was invalid, where (i) the proposed amended business plan contained significant misleading and inaccurate statements; and (ii) the chairperson did not act impartially and failed to provide any meaningful opportunity for debate	2. AGM resolution on T2 Amended Business plan These objections are fully traversed above and in the attached document (par. 4). The resolution was adopted with a majority (final vote outcome: 116 in favour - 14 against and 3 abstentions).	1	Property registered in the name of Confirmed: Additional Rate Payer
7					0	Confirmed: Additional Rate Payer Only one objection per Additional Rate Payer can be recorded, refer Objection 7
8			3. Proposed Amendment is Material (section 26 of CID By-law) The incorrect statutory process has been followed, as the proposed amendment constitutes a material amendment of the “scope or level of services or projects carried out by the [WCID NPC]” as contemplated in section 26(1)(d) of the City By-law, 2023 (“the CID by-law”)	This matter is fully traversed above and in the "comments" spreadsheet. The amendment is not material it falls within the provisions of section 25 of the City's by-law. See par. 14 in attached document.	1	Property registered in the name of Confirmed: Additional Rate Payer
9					0	Property registered in the name of Confirmed: Additional Rate Payer Only one objection per Additional Rate Payer can be recorded. Already Objected, refer Objection 3.
10					0	Confirmed: Additional Rate Payer Only one objection per Additional Rate Payer can be recorded, refer Objection 10
11					1	Property registered in the name of Confirmed: Additional Rate Payer
12					1	Property registered in the name of Confirmed: Additional Rate Payer
13			4. Amendment is not in the public interest	4. Amendment is not in the public interest This matter is fully traversed above. This objection is unfounded. A minority cannot dictate to a majority.	0	Property registered in the name of Confirmed: Not the Additional Rate Payer. Only one objection per Additional Rate Payer can be recorded, refer Objection 13
14					0	Property registered in the name of Confirmed: Additional Rate Payer. Only one objection per Additional Rate Payer can be recorded, refer Objection 4
15					0	Property registered in the name of Confirmed: Additional Rate Payer Only one objection per Additional Rate Payer can be recorded, refer Objection 2
			5. AGM invalid - proxies The AGM was in any event invalid, in as much as the WCID NPC imposed a time limit on proxies which constituted a material violation of the Companies Act, 71 of 2008 (“the Companies Act”).	5. AGM invalid due to proxies This matter is fully traversed above and in the attached document (see par. 2).
